

Genex Advisor Review Packet - Clean Layout

C01 - Noah

Name	Noah	Age (months)	10
Diagnosis	Down syndrome	Daily time	10 min/day
Concern	Not sitting independently yet, Hypotonia, slow feeding, socially engaged		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	4	6	needs_special_support
Social / Emotional	9	1	no_special_support
Language / Communication	5	5	needs_special_support
Cognitive / Adaptive	6	4	monitor_and_enrich

Focus areas

- Movement / Physical
- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

1. Tummy Time with Elbow Support (5 min) - needs_special_support
Place Noah on his tummy on a soft surface. Support his elbows under his shoulders to help him push up and hold his head steady. Encourage him to look around and reach for toys placed in front of him. Keep the activity in short bouts and pause for rest if the child tires.

2. Sound Imitation Game (5 min) - needs_special_support
Make different sounds like 'ma', 'ba', or 'ah' and encourage Noah to imitate you. Use a fun tone and facial expressions to engage him. Keep the activity in short bouts and pause for rest if the child tires.

3. Supported Sitting Practice (5 min) - needs_special_support
Sit Noah on the floor with pillows or a soft surface around him for support. Encourage him to lean on his hands while you place toys in front of him to reach for. Keep the activity in short bouts and pause for rest if the child tires.

4. Turn-Taking Sounds (5 min) - needs_special_support
Sit facing Noah and take turns making sounds. Start with a sound, then pause for him to respond. Celebrate his attempts to make sounds. Keep the activity in short bouts and pause for rest if the child tires.

5. Toy Grasping and Reaching (5 min) - needs_special_support
Place a variety of toys within Noah's reach while he is lying on his back. Encourage him to reach for and grasp the toys, helping him bring them to his mouth. Keep the activity in short bouts and pause for rest if the child tires. Keep the child upright and closely supervised. Avoid choking-risk foods and stop if coughing, gagging, or distress occurs.

5. Summary

This plan prioritizes Movement / Physical, Language / Communication, Cognitive / Adaptive for Noah. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C02 - Maya

Name	Maya	Age (months)	18
Diagnosis	No formal diagnosis	Daily time	10 min/day
Concern	No words yet, uses gestures, understands simple commands, good eye contact		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	18	0	no_special_support
Social / Emotional	18	0	no_special_support
Language / Communication	13	5	needs_special_support
Cognitive / Adaptive	15	3	monitor_and_enrich

Focus areas

- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

1. Follow the Leader (5 min) - needs_special_support
Use simple commands like 'clap your hands' or 'touch your nose' and encourage Maya to follow along. Use gestures to model the actions.

2. Block Stacking (5 min) - monitor_and_enrich
Provide Maya with a set of small blocks. Encourage her to stack at least two blocks on top of each other. You can model this by stacking the blocks yourself first.

3. Name That Toy (5 min) - needs_special_support
Hold up a familiar toy and clearly say its name. Encourage Maya to look at the toy when you say its name. Repeat with different toys.

4. Chores Imitation (5 min) - monitor_and_enrich
Pick a simple chore, like sweeping with a broom. Show Maya how to do it and encourage her to imitate you. You can use a small broom for her to use.

5. Point and Ask (5 min) - needs_special_support
Place a few toys out of reach. Encourage Maya to point at the toy she wants and say 'please' or 'help'. Respond by giving her the toy.

5. Summary

This plan prioritizes Language / Communication, Cognitive / Adaptive for Maya. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C03 - Leo

Name	Leo	Age (months)	26
Diagnosis	Autism spectrum disorder	Daily time	10 min/day
Concern	Limited eye contact and few words, Repetitive play, transitions hard, picky eating		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	24	2	monitor_and_enrich
Social / Emotional	18	8	needs_special_support
Language / Communication	17	9	needs_special_support
Cognitive / Adaptive	24	2	monitor_and_enrich

Focus areas

- Language / Communication
- Social / Emotional
- Movement / Physical

4. Daily Activities

1. Container Play (5 min) - monitor_and_enrich
Give Leo a container and a few small toys. Encourage him to put the toys in the container and take them out. You can model this action first. Keep it short and predictable, offer a simple choice, and stop before frustration escalates. Use lower-noise, lower-clutter materials when possible.

2. Book Pointing Game (5 min) - needs_special_support
Choose a simple picture book. Ask Leo to point to items in the book when you say their names, like 'Where's the bear?' Keep it short and predictable, offer a simple choice, and stop before frustration escalates. Use lower-noise, lower-clutter materials when possible.

3. Dress-Up Game (5 min) - needs_special_support
Play a game where you help Leo dress a doll or stuffed animal. Encourage him to push the arm through the sleeve or lift the foot to put on shoes. Keep it short and predictable, offer a simple choice, and stop before frustration escalates. Use lower-noise, lower-clutter materials when possible.

4. More or All Done (5 min) - needs_special_support
During snack time, use simple phrases like 'more' or 'all done.' Encourage Leo to use these words to express his needs. Keep it short and predictable, offer a simple choice, and stop before frustration escalates. Use lower-noise, lower-clutter materials when possible.

5. Point and Show (5 min) - needs_special_support
Go outside or look out the window. Encourage Leo to point at interesting things he sees, and respond with excitement or questions to promote engagement. Keep it short and predictable, offer a simple choice, and stop before frustration escalates. Use lower-noise, lower-clutter materials when possible.

5. Summary

This plan prioritizes Language / Communication, Social / Emotional, Movement / Physical for Leo. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C04 - Sofia

Name	Sofia	Age (months)	37
Diagnosis	Prematurity history	Daily time	10 min/day
Concern	Speech hard to understand, Fine motor delay, good comprehension		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	24	13	needs_special_support
Social / Emotional	36	1	no_special_support
Language / Communication	27	10	needs_special_support
Cognitive / Adaptive	30	7	needs_special_support

Focus areas

- Movement / Physical
- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

1. Spoon Practice (5 min) - needs_special_support
Provide Sofia with a bowl of soft food (like yogurt or applesauce) and a spoon. Encourage her to scoop and eat with the spoon, providing support as needed.

2. Color Hunt (5 min) - needs_special_support
Ask Sofia to find objects around the house that match a specific color. For example, say 'Can you find something red?' and help her point to the object.

3. Ball Kicking (5 min) - needs_special_support
Set up a soft ball in a safe area. Encourage Sofia to kick the ball with her foot. You can roll the ball to her to encourage her to kick it back.

4. Two-Step Instructions (5 min) - needs_special_support
Give Sofia simple two-step instructions like 'Pick up the toy and put it in the box.' Encourage her to follow the directions.

5. Jumping Fun (5 min) - needs_special_support
Create a safe space with a soft surface. Encourage Sofia to jump off the ground with both feet. You can demonstrate and cheer her on.

5. Summary

This plan prioritizes Movement / Physical, Language / Communication, Cognitive / Adaptive for Sofia. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C05 - Ethan

Name	Ethan	Age (months)	54
Diagnosis	Cerebral palsy	Daily time	10 min/day
Concern	Trouble keeping up in preschool, Self-care delays, frequent falls, difficulty with stairs, uses walker sometimes, good cognition		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	36	18	needs_special_support
Social / Emotional	60	0	no_special_support
Language / Communication	60	0	no_special_support
Cognitive / Adaptive	48	6	monitor_and_enrich

Focus areas

- Movement / Physical
- Cognitive / Adaptive

4. Daily Activities

- 1. Bead Stringing (5 min)** - needs_special_support
Provide large beads and a shoelace or string. Encourage Ethan to thread the beads onto the string. Offer support by holding the string steady if needed. Use stable support and close adult supervision throughout.
- 2. Color Sorting (5 min)** - monitor_and_enrich
Gather colored objects (like blocks or toys). Ask Ethan to sort them into groups by color. You can help him name each color as he sorts.
- 3. Fork Practice (5 min)** - needs_special_support
Set up a small snack with cut-up soft fruits or vegetables. Encourage Ethan to use a fork to pick up the food. Provide guidance and support as needed. Use stable support and close adult supervision throughout.
- 4. Counting Fun (5 min)** - monitor_and_enrich
Count objects around the house together (like toys or snacks). Encourage Ethan to count to 10 with your support, pointing to each item as you count.
- 5. Ball Catching (5 min)** - needs_special_support
Sit on the floor with Ethan and use a large, soft ball. Roll the ball to him and encourage him to catch it. Use hand support if necessary to help him position his hands correctly. Use stable support and close adult supervision throughout.

5. Summary

This plan prioritizes Movement / Physical, Cognitive / Adaptive for Ethan. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C06 - Amina

Name	Amina	Age (months)	60
Diagnosis	Global developmental delay	Daily time	10 min/day
Concern	Learning and routines are hard, Short attention span, follows only simple directions		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	48	12	needs_special_support
Social / Emotional	60	0	no_special_support
Language / Communication	52	8	monitor_and_enrich
Cognitive / Adaptive	36	24	needs_special_support

Focus areas

- Cognitive / Adaptive
- Movement / Physical
- Language / Communication

4. Daily Activities

1. Color Sorting (5 min) - needs_special_support
Gather a few colored items (like blocks or toys). Ask Amina to sort them by color into different containers. You can help her by naming the colors as she sorts. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

2. Ball Toss (5 min) - needs_special_support
Sit on the floor with Amina and roll a large ball back and forth. Encourage her to catch the ball when you roll it to her. Celebrate her successes! Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

3. Simple Story Sequencing (5 min) - needs_special_support
Use a familiar storybook. Read a page and then ask Amina what happens next. Encourage her to point to pictures that represent the story. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

4. Crayon Drawing (5 min) - needs_special_support
Provide Amina with crayons and paper. Encourage her to hold the crayon between her fingers and thumb while she draws simple shapes or lines. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Drawing Shapes (5 min) - needs_special_support
Show Amina how to draw a circle. Then, encourage her to try drawing it herself. Praise her efforts and guide her if needed. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Summary

This plan prioritizes Cognitive / Adaptive, Movement / Physical, Language / Communication for Amina. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C07 - Lucas

Name	Lucas	Age (months)	14
Diagnosis	Fragile X syndrome	Daily time	10 min/day
Concern	Not walking, limited babbling, Sensory sensitivity, shy socially		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	9	5	needs_special_support
Social / Emotional	9	5	needs_special_support
Language / Communication	4	10	needs_special_support
Cognitive / Adaptive	9	5	needs_special_support

Focus areas

- Language / Communication
- Movement / Physical
- Social / Emotional

4. Daily Activities

1. Sound Imitation Game (5 min) - needs_special_support
Make simple sounds like 'ahh', 'ooo', or 'ee' and encourage Lucas to imitate you. Use a mirror to make it fun and visually engaging. Keep the activity in short bouts and pause for rest if the child tires. Use lower-noise, lower-clutter materials when possible.

2. Peek-a-Boo with a Twist (5 min) - needs_special_support
Sit in front of Lucas and cover your face with a soft cloth. Then, reveal your face with a big smile and say 'Peek-a-boo!' Encourage him to mimic your expression. Repeat several times. Keep the activity in short bouts and pause for rest if the child tires. Use lower-noise, lower-clutter materials when possible.

3. Turn-Taking Sounds (5 min) - needs_special_support
Sit face-to-face with Lucas and take turns making sounds. Start with a sound, then wait for him to respond. Encourage him to make a sound back. Keep the activity in short bouts and pause for rest if the child tires. Use lower-noise, lower-clutter materials when possible.

4. Facial Expression Imitation (5 min) - needs_special_support
Make different facial expressions (happy, sad, surprised) and encourage Lucas to imitate you. Use a mirror if possible to help him see his own expressions. Keep the activity in short bouts and pause for rest if the child tires. Use lower-noise, lower-clutter materials when possible.

5. Follow the Sound (5 min) - needs_special_support
Make a sound (like clapping or a gentle bell) and see if Lucas turns his head towards the sound. Praise him when he does. Keep the activity in short bouts and pause for rest if the child tires. Use lower-noise, lower-clutter materials when possible.

5. Summary

This plan prioritizes Language / Communication, Movement / Physical, Social / Emotional for Lucas. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C08 - Emma

Name	Emma	Age (months)	32
Diagnosis	Suspected childhood apraxia of speech	Daily time	10 min/day
Concern	Very limited speech output, Uses gestures, gets frustrated, inconsistent sounds		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	36	0	no_special_support
Social / Emotional	36	0	monitor_and_enrich
Language / Communication	15	17	needs_special_support
Cognitive / Adaptive	30	2	monitor_and_enrich

Focus areas

- Language / Communication
- Cognitive / Adaptive
- Social / Emotional

4. Daily Activities

1. Toy Naming Game (5 min) - needs_special_support
Show Emma a toy and say its name clearly. Encourage her to repeat the name or make a sound related to the toy. Use gestures to help her understand. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

2. Color Sorting Game (5 min) - monitor_and_enrich
Gather a few colored items (like blocks or crayons). Ask Emma to find and hand you a specific color, like 'Can you give me the red one?'. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

3. Follow the Simple Direction (5 min) - needs_special_support
Give Emma a simple one-step direction like 'give me the toy' without gestures. Praise her when she follows the direction. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

4. Two-Step Instructions (5 min) - monitor_and_enrich
Give Emma a simple two-step instruction, such as 'Pick up the toy and put it in the box'. Praise her when she follows the instructions. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Point and Ask (5 min) - needs_special_support
Place a few toys in front of Emma. Encourage her to point to a toy she wants and say its name or make a sound. Respond to her request. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Summary

This plan prioritizes Language / Communication, Cognitive / Adaptive, Social / Emotional for Emma. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C09 - Zain

Name	Zain	Age (months)	48
Diagnosis	Attention and self-regulation concerns (possible ADHD)	Daily time	10 min/day
Concern	Very active, impulsive, Big emotional reactions, interrupts, difficulty following routines, social interest intact		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	36	12	needs_special_support
Social / Emotional	48	0	monitor_and_enrich
Language / Communication	48	0	no_special_support
Cognitive / Adaptive	30	18	needs_special_support

Focus areas

- Cognitive / Adaptive
- Movement / Physical
- Social / Emotional

4. Daily Activities

1. Color Sorting Game (5 min) - needs_special_support
Gather a few colored items (like blocks or crayons). Ask Zain to sort them by color into different containers. Start with two colors and gradually add more as he becomes comfortable. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

2. Clothes Dressing Practice (5 min) - needs_special_support
Lay out loose pants and a jacket. Encourage Zain to put them on by himself with your support as needed. Start with one item and gradually add another. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

3. Two-Step Instructions (5 min) - needs_special_support
Give Zain simple two-step instructions, such as 'Pick up the toy and put it in the box.' Praise him for following the directions. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

4. Bead Stringing (5 min) - needs_special_support
Provide large beads and a string. Show Zain how to string the beads together, encouraging him to try it independently. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Pretend Play with Dolls (5 min) - needs_special_support
Use dolls or stuffed animals to engage in pretend play. Encourage Zain to feed the doll or put it to bed, modeling the actions for him to imitate. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Summary

This plan prioritizes Cognitive / Adaptive, Movement / Physical, Social / Emotional for Zain. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C10 - Isla

Name	Isla	Age (months)	44
Diagnosis	SYNGAP1-related disorder	Daily time	10 min/day
Concern	Delayed speech and balance, Attention issues, clumsy gait, limited pretend play		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	30	14	needs_special_support
Social / Emotional	36	8	needs_special_support
Language / Communication	18	26	needs_special_support
Cognitive / Adaptive	30	14	needs_special_support

Focus areas

- Language / Communication
- Movement / Physical
- Cognitive / Adaptive

4. Daily Activities

1. Body Part Show and Tell (5 min) - needs_special_support

Ask Isla to point to specific body parts on herself or a doll when you name them. Start with simple parts like 'head' or 'hands'. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

2. Color Sorting (5 min) - needs_special_support

Gather a few colored items (like blocks or crayons). Ask Isla to sort them by color, helping her point to each color as she sorts. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

3. Book Pointing Game (5 min) - needs_special_support

Read a picture book together. Ask Isla to point to specific items in the pictures, like 'Where is the bear?' or 'Show me the car.' Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

4. Two-Step Instructions Game (5 min) - needs_special_support

Give Isla simple two-step instructions, like 'pick up the toy and put it in the box.' Praise her when she follows the directions correctly. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Sound Imitation Fun (5 min) - needs_special_support

Make animal sounds and encourage Isla to imitate them. Start with simple sounds like 'moo' or 'quack'. Celebrate her attempts with claps or cheers. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Summary

This plan prioritizes Language / Communication, Movement / Physical, Cognitive / Adaptive for Isla. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Short feedback: What would you change? What is missing? Any concerns?

C11 - Aria

Name	Aria	Age (months)	20
Diagnosis	No diagnosis	Daily time	10 min/day
Concern	Only ~10 words, very active, good eye contact, understands well		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	24	0	no_special_support
Social / Emotional	24	0	no_special_support
Language / Communication	17	3	monitor_and_enrich
Cognitive / Adaptive	24	0	no_special_support

Focus areas

- Language / Communication

4. Daily Activities

1. Follow the Direction (5 min) - monitor_and_enrich
Say a simple direction like 'come here' or 'give me the toy' and encourage Aria to follow it without gestures.

2. Sound Imitation Game (5 min) - monitor_and_enrich
Make different animal sounds and encourage Aria to imitate them. Use sounds she enjoys to keep her engaged.

3. Two-Word Phrases (5 min) - monitor_and_enrich
Encourage Aria to use two-word phrases by modeling them yourself, like 'more juice' or 'big truck'.

4. Gesture Play (5 min) - monitor_and_enrich
Use gestures like waving, blowing kisses, or nodding while saying the words. Encourage Aria to imitate these gestures.

5. Point and Name (7 min) - monitor_and_enrich
Look at a picture book together and ask Aria to point to specific animals or objects while you name them.

5. Summary

This plan prioritizes Language / Communication for Aria. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness

C12 - Mateo

Name	Mateo	Age (months)	30
Diagnosis	No formal diagnosis	Daily time	10 min/day
Concern	Good eye contact but no words, lines up toys, responds to name inconsistently		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	30	0	no_special_support
Social / Emotional	24	6	needs_special_support
Language / Communication	12	18	needs_special_support
Cognitive / Adaptive	24	6	needs_special_support

Focus areas

- Language / Communication
- Social / Emotional
- Cognitive / Adaptive

4. Daily Activities

1. Sound Imitation Game (5 min) - needs_special_support
Make different animal sounds and encourage Mateo to imitate them. Start with simple sounds like 'moo' for a cow or 'meow' for a cat. Use toys or pictures of the animals to make it more engaging.

2. Face-to-Face Play (5 min) - needs_special_support
Sit on the floor facing Mateo. Make different facial expressions (happy, sad, surprised) and encourage him to imitate you. Use a mirror if available to enhance engagement.

3. Follow the Gesture (5 min) - needs_special_support
Use simple gestures like waving, pointing, or clapping and encourage Mateo to follow along. You can say 'wave bye-bye' or 'clap your hands' while demonstrating the action.

4. Clean-Up Time Game (5 min) - needs_special_support
Turn clean-up time into a game. Sing a clean-up song while picking up toys together. Encourage Mateo to help by responding to your prompts.

5. Simple Direction Following (5 min) - needs_special_support
Give Mateo simple directions using both words and gestures. For example, say 'Give me the ball' while holding out your hand. Praise him when he follows the direction.

5. Summary

This plan prioritizes Language / Communication, Social / Emotional, Cognitive / Adaptive for Mateo. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C13 - Luna

Name	Luna	Age (months)	42
Diagnosis	Speech delay	Daily time	10 min/day
Concern	Limited speech, understands well, parents have very limited time for activities		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	48	0	no_special_support
Social / Emotional	30	12	needs_special_support
Language / Communication	24	18	needs_special_support
Cognitive / Adaptive	36	6	monitor_and_enrich

Focus areas

- Language / Communication
- Social / Emotional
- Cognitive / Adaptive

4. Daily Activities

1. Body Part Show and Tell (5 min) - needs_special_support

Ask Luna to point to different body parts on herself or a doll when you name them. For example, say 'Where's your nose?' and encourage her to point.

2. Clean-Up Time Together (5 min) - needs_special_support

At clean-up time, say 'It's clean-up time!' and encourage Luna to help pick up toys. Make it fun by singing a clean-up song together.

3. Book Pointing Game (5 min) - needs_special_support

Choose a picture book and ask Luna to point to specific animals or objects when you ask, like 'Where is the bear?' or 'Show me the cat.'

4. Look at Me Game (5 min) - needs_special_support

Take turns showing each other something fun you can do, like jumping or spinning. Encourage Luna to say 'Look at me!' when it's her turn.

5. Two-Word Phrases (5 min) - needs_special_support

Encourage Luna to use two-word phrases by modeling them. For example, say 'More juice' or 'Big truck' and prompt her to repeat after you.

5. Summary

This plan prioritizes Language / Communication, Social / Emotional, Cognitive / Adaptive for Luna. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

C14 - Ryan

Name	Ryan	Age (months)	50
Diagnosis	No diagnosis	Daily time	10 min/day
Concern	Tantrums, difficulty with transitions, strong language skills, social but rigid		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	60	0	no_special_support
Social / Emotional	48	2	no_special_support
Language / Communication	48	2	no_special_support
Cognitive / Adaptive	48	2	no_special_support

Focus areas

- Social / Emotional

4. Daily Activities

1. Emotion Charades (5 min) - enrich_and_observe
Take turns making faces to show different emotions (happy, sad, surprised). Ryan can guess the emotion and then mimic it back. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

2. Feelings Storytime (5 min) - enrich_and_observe
Read a short story together. Pause to discuss how the characters might feel and why. Encourage Ryan to express his thoughts. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

3. Role Play Helpers (5 min) - enrich_and_observe
Pretend to be helpers in different scenarios (like a doctor, teacher, or firefighter). Take turns helping each other and discussing how it feels to help. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

4. Transition Countdown (5 min) - enrich_and_observe
Use a timer to signal transitions between activities. When the timer goes off, practice saying goodbye to the current activity and hello to the next. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Compliment Circle (5 min) - enrich_and_observe
Sit in a circle (or face each other) and take turns giving compliments. Encourage Ryan to think of something nice to say about you. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Summary

This plan prioritizes Social / Emotional for Ryan. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?
