

C01 — Noah (10 months)

Diagnosis: Down syndrome

1. Child Profile

Name: Noah
Age: 10 months (10 months)
Diagnosis: Down syndrome
Daily time: 10 min/day

Key concerns:

- Not sitting independently yet
- Hypotonia
- slow feeding
- socially engaged

2. Parent Input (questions + answers)

- [4m | postural_control_and_transitions] holds head steady without support when you are holding him -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [4m | postural_control_and_transitions] pushes up onto elbows or forearms when on tummy sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [4m | fine_motor_hand_use] bring hands to mouth -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [6m | postural_control_and_transitions] leans on hands to support herself when sitting -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [6m | postural_control_and_transitions] pushes up with straight arms when on tummy -> no | followup: not able yet | barrier: not_able_yet (ok)
- [6m | postural_control_and_transitions] rolls from tummy to back -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [9m | postural_control_and_transitions] gets to sitting position by herself -> no | followup: not able yet | barrier: not_able_yet (ok)
- [9m | postural_control_and_transitions] sits without support -> no | followup: not able yet | barrier: not_able_yet (ok)
- [9m | fine_motor_hand_use] moves things from one hand to her other hand -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [2m | early_vocalization_and_babbling] makes sounds other than crying -> yes (ok)
- [2m | receptive_language] reacts to loud sounds -> yes (ok)
- [4m | early_vocalization_and_babbling] makes cooing sounds like ooooo or ahhh -> yes (ok)

Full transcript is provided in the output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	4	6	needs_special_supp
Social / Emotional	9	1	no_special_support
Language / Communication	5	5	needs_special_supp

Focus areas:

- Movement / Physical
- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

- 1. Tummy Time with Elbow Support (5 min) — needs_special_support
Place Noah on his tummy on a soft surface. Support his elbows under his shoulders to help him push up and hold his head steady. Encourage him to look around and reach for toys placed...
- 2. Sound Imitation Game (5 min) — needs_special_support
Make different sounds like 'ma', 'ba', or 'ah' and encourage Noah to imitate you. Use a fun tone and facial expressions to engage him. Keep the activity in short bouts and pause for rest if ...
- 3. Supported Sitting Practice (5 min) — needs_special_support
Sit Noah on the floor with pillows or a soft surface around him for support. Encourage him to lean on his hands while you place toys in front of him to reach for. Keep the activity in sh...
- 4. Turn-Taking Sounds (5 min) — needs_special_support
Sit facing Noah and take turns making sounds. Start with a sound, then pause for him to respond. Celebrate his attempts to make sounds. Keep the activity in short bouts and pause ...
- 5. Toy Grasping and Reaching (5 min) — needs_special_support
Place a variety of toys within Noah's reach while he is lying on his back. Encourage him to reach for and grasp the toys, helping him bring them to his mouth. Keep the activity in short bouts ...

5. Summary

This plan prioritizes Movement / Physical, Language / Communication, Cognitive / Adaptive for Noah. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness

Short feedback: What would you change? | What is missing? | Any concerns?

C02 — Maya (18 months)

Diagnosis: No formal diagnosis

1. Child Profile

Name: Maya

Age: 18 months (18 months)

Diagnosis: No formal diagnosis

Daily time: 10 min/day

Key concerns:

- No words yet
- uses gestures
- understands simple commands
- good eye contact

2. Parent Input (questions + answers)

- [9m | gestural_communication] lifts arms up to be picked up -> yes (ok)
- [9m | early_vocalization_and_babbling] makes a lot of different sounds like mamamamama and bababababa -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [12m | gestural_communication] waves goodbye -> yes (ok)
- [12m | expressive_language] calls parents mama or dada or another special name -> no | followup: not able yet | barrier: not_able_yet (ok)
- [12m | receptive_language] understands no so pauses briefly or stops when you say it -> yes (ok)
- [15m | gestural_communication] points to ask for something or to get help -> yes (ok)
- [15m | receptive_language] follows directions given with both a gesture and words for example she gives you a toy when you hold out your hand and say give me the toy -> yes (ok)
- [15m | receptive_language] looks at a familiar object when you name it -> yes (ok)
- [9m | exploration_and_object_use] bangs to things together -> yes (ok)
- [9m | object_permanence_and_problem_solving] looks for objects when dropped out of sight -> yes (ok)
- [12m | object_permanence_and_problem_solving] looks for things he sees you hide like a toy under a blanket -> yes (ok)
- [12m | exploration_and_object_use] puts something in a container like a block in a cup -> yes (ok)

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	18	0	no_special_support
Social / Emotional	18	0	no_special_support
Language / Communication	13	5	needs_special_supp
Cognitive / Adaptive	15	3	monitor_and_enrich

Focus areas:

- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

1. Follow the Leader (5 min) — needs_special_support

Use simple commands like 'clap your hands' or 'touch your nose' and encourage Maya to follow along. Use gestures to model the actions.

2. Block Stacking (5 min) — monitor_and_enrich

Provide Maya with a set of small blocks. Encourage her to stack at least two blocks on top of each other. You can model this by stacking the blocks yourself first.

3. Name That Toy (5 min) — needs_special_support

Hold up a familiar toy and clearly say its name. Encourage Maya to look at the toy when you say its name. Repeat with different toys.

4. Chores Imitation (5 min) — monitor_and_enrich

Pick a simple chore, like sweeping with a broom. Show Maya how to do it and encourage her to imitate you. You can use a small broom for her to use.

5. Point and Ask (5 min) — needs_special_support

Place a few toys out of reach. Encourage Maya to point at the toy she wants and say 'please' or 'help'. Respond by giving her the toy.

5. Summary

This plan prioritizes Language / Communication, Cognitive / Adaptive for Maya. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness

Short feedback: What would you change? | What is missing? | Any concerns?

C03 — Leo (2y 2m)

Diagnosis: Autism spectrum disorder

1. Child Profile

Name: Leo
Age: 2y 2m (26 months)
Diagnosis: Autism spectrum disorder
Daily time: 10 min/day

Key concerns:

- Limited eye contact and few words
- Repetitive play
- transitions hard
- picky eating

2. Parent Input (questions + answers)

- [12m | expressive_language] calls parents mama or dada or another special name -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [12m | receptive_language] understands no so pauses briefly or stops when you say it -> yes (ok)
- [12m | gestural_communication] waves goodbye -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [15m | expressive_language] tries to say or or two words besides mama or dada like ball or da for dog -> yes (ok)
- [15m | receptive_language] follows directions given with both a gesture and words for example she gives you a toy when you hold out your hand and say give me the toy -> yes (ok)
- [15m | receptive_language] looks at a familiar object when you name it -> yes (ok)
- [18m | expressive_language] tries to say three or more words besides mama or dada -> yes (ok)
- [18m | receptive_language] follows one step directions without any gestures like giving you the toy when you say give it to me -> yes (ok)
- [12m | social_engagement_and_joint_attention] play games with you like pat a cake -> with_help | followup: reminders or step-by-step prompting | barrier: needs_prompting (ok)
- [15m | social_engagement_and_joint_attention] claps when excited -> sometimes | followup: can do it, but only in some situations | barrier: situational_inconsistency (ok)
- [15m | social_engagement_and_joint_attention] shows you affection like hugs or cuddles or kisses you -> sometimes | followup: can do it, but only in some situations | barrier: situational_inconsistency (ok)
- [15m | social_engagement_and_joint_attention] shows you an object she likes -> with_help | followup: reminders or step-by-step prompting | barrier: needs_prompting (ok)

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	24	2	monitor_and_enrich
Social / Emotional	18	8	needs_special_supp
Language / Communication	17	9	needs_special_supp
Cognitive / Adaptive	24	2	monitor_and_enrich

Focus areas:

- Language / Communication
- Social / Emotional
- Movement / Physical

4. Daily Activities

1. Container Play (5 min) — monitor_and_enrich

Give Leo a container and a few small toys. Encourage him to put the toys in the container and take them out. You can model this action first. Keep it short and predictable, offer a sim...

2. Simple Pointing Game (5 min) — needs_special_support

Choose a simple picture book. Ask Leo to point to items in the book when you say their names, like 'Where's the bear?' Keep it short and predictable, offer a simple choice, and stop bef...

3. Dress-Up Game (5 min) — needs_special_support

Play a game where you help Leo dress a doll or stuffed animal. Encourage him to push the arm through the sleeve or lift the foot to put on shoes. Keep it short and predictable, offer a sim...

4. More or All Done (5 min) — needs_special_support

During snack time, use simple phrases like 'more' or 'all done.' Encourage Leo to use these words to express his needs. Keep it short and predictable, offer a simple choice, and s...

5. Point and Show (5 min) — needs_special_support

Go outside or look out the window. Encourage Leo to point at interesting things he sees, and respond with excitement or questions to promote engagement. Keep it short and predictab...

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Leo. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness

C04 — Sofia (3y 1m)

Diagnosis: Prematurity history

1. Child Profile

Name: Sofia
Age: 3y 1m (37 months)
Diagnosis: Prematurity history
Daily time: 10 min/day

Key concerns:

- Speech hard to understand
- Fine motor delay
- good comprehension

2. Parent Input (questions + answers)

- [24m | self_help_motor_skills] eats with a spoon -> with_help | followup: reminders or step-by-step prompting | barrier: needs_prompting (ok)
- [24m | gross_motor_mobility_and_coordination] kicks a ball -> yes (ok)
- [24m | gross_motor_mobility_and_coordination] runs -> yes (ok)
- [30m | fine_motor_hand_use] turns book pages one at a time when you read to her -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [30m | fine_motor_hand_use] uses hands to twist things like turning doorknobs or unscrewing lids -> sometimes | followup: can do it, but only in some situations | barrier: situational_inconsistency (ok)
- [30m | gross_motor_mobility_and_coordination] jumps off the ground with both feet -> yes (ok)
- [36m | fine_motor_hand_use] strings items together like large beads or macaroni -> with_help | followup: reminders or step-by-step prompting | barrier: needs_prompting (ok)
- [36m | self_help_motor_skills] puts on some clothes by himself like loose pants or a jacket -> with_help | followup: reminders or step-by-step prompting | barrier: needs_prompting (ok)
- [36m | self_help_motor_skills] uses a fork -> sometimes | followup: can do it, but only in some situations | barrier: situational_inconsistency (ok)
- [18m | expressive_language] tries to say three or more words besides mama or dada -> yes (ok)
- [18m | expressive_language] tries to say three or more words besides mama or dada -> yes (ok)
- [18m | receptive_language] follows one step directions without any gestures like giving you the toy when you say give it to me -> yes (ok)
- [24m | expressive_language] says at least two words together like more milk -> yes (ok)

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	24	13	needs_special_supp
Social / Emotional	36	1	no_special_support
Language / Communication	27	10	needs_special_supp
Cognitive / Adaptive	30	7	needs_special_supp

Focus areas:

- Movement / Physical
- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

- 1. Spoon Practice (5 min) — needs_special_support**
Provide Sofia with a bowl of soft food (like yogurt or applesauce) and a spoon. Encourage her to scoop and eat with the spoon, providing support as needed.
- 2. Color Hunt (5 min) — needs_special_support**
Ask Sofia to find objects around the house that match a specific color. For example, say 'Can you find something red?' and help her point to the object.
- 3. Ball Kicking (5 min) — needs_special_support**
Set up a soft ball in a safe area. Encourage Sofia to kick the ball with her foot. You can roll the ball to her to encourage her to kick it back.
- 4. Two-Step Instructions (5 min) — needs_special_support**
Give Sofia simple two-step instructions like 'Pick up the toy and put it in the box.' Encourage her to follow the directions.
- 5. Jumping Fun (5 min) — needs_special_support**
Create a safe space with a soft surface. Encourage Sofia to jump off the ground with both feet. You can demonstrate and cheer her on.

5. Summary

This plan prioritizes Movement / Physical, Language / Communication, Cognitive / Adaptive for Sofia. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness

C05 — Ethan (4y 6m)

Diagnosis: Cerebral palsy

1. Child Profile

Name: Ethan
Age: 4y 6m (54 months)
Diagnosis: Cerebral palsy
Daily time: 10 min/day

Key concerns:

- Trouble keeping up in preschool
- Self-care delays
- frequent falls
- difficulty with stairs

2. Parent Input (questions + answers)

- [24m | gross_motor_mobility_and_coordination] kicks a ball -> with_help | followup: physical help / hands-on support | barrier: physical_help (ok)
- [24m | gross_motor_mobility_and_coordination] runs -> no | followup: not able yet | barrier: not_able_yet (ok)
- [24m | gross_motor_mobility_and_coordination] walks not climbs up a few stairs with or without help -> with_help | followup: physical help / hands-on support | barrier: physical_help (ok)
- [30m | gross_motor_mobility_and_coordination] jumps off the ground with both feet -> no | followup: not able yet | barrier: not_able_yet (ok)
- [30m | self_help_motor_skills] takes some clothes off by himself like loose parts of a jacket -> with_help | followup: reminders or step-by-step prompting | barrier: needs_prompting (ok)
- [30m | fine_motor_hand_use] turns book pages one at a time when you read to her -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [36m | self_help_motor_skills] puts on some clothes by himself like loose pants or a jacket -> with_help | followup: reminders or step-by-step prompting | barrier: needs_prompting (ok)
- [36m | self_help_motor_skills] uses a fork -> with_help | followup: reminders or step-by-step prompting | barrier: needs_prompting (ok)
- [36m | fine_motor_hand_use] strings items together like large beads or macaroni -> with_help | followup: reminders or step-by-step prompting | barrier: needs_prompting (ok)
- [30m | concepts_and_following_directions] follows two step instructions like put the toy down and close the door -> yes (ok)
- [30m | concepts_and_following_directions] shows she knows at least one color like pointing to a red crayon when you ask which one is red -> yes (ok)
- [30m | object_permanence_and_problem_solving] shows simple problem solving skills like standing on a small stool to reach something -> with_help | followup: physical help / hands-on support | barrier: physical_help (ok)

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	36	18	needs_special_supp
Social / Emotional	60	0	no_special_support
Language / Communication	60	0	no_special_support

C06 — Amina (5 years)

Diagnosis: Global developmental delay

1. Child Profile

Name: Amina
Age: 5 years (60 months)
Diagnosis: Global developmental delay
Daily time: 10 min/day

- Key concerns:
- Learning and routines are hard
 - Short attention span
 - follows only simple directions

2. Parent Input (questions + answers)

- [30m | concepts_and_following_directions] follows two step instructions like put the toy down and close the door -> no | followup: not able yet | barrier: not_able_yet (ok)
- [30m | concepts_and_following_directions] shows she knows at least one color like pointing to a red crayon when you ask which one is red -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [30m | object_permanence_and_problem_solving] shows simple problem solving skills like standing on a small stool to reach something -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [36m | safety_awareness] avoids touching hot objects like the stove when you warn her -> sometimes | followup: can do it, but gets distracted | barrier: distractibility (ok)
- [36m | pre_academic_skills] draws a circle when you show her how -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [48m | pre_academic_skills] draws a person with three or more body parts -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [48m | concepts_and_following_directions] names a few colors or items -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [48m | concepts_and_following_directions] tell what comes next in a well known story -> not | followup: not able yet | barrier: not_able_yet (ok)
- [48m | gross_motor_mobility_and_coordination] catches a large ball most of the times -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [48m | fine_motor_hand_use] holds crayon or pencil between fingers and thumb not fist -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [48m | self_help_motor_skills] serves herself food or pours water with adult supervision -> with_help | followup: reminders or step-by-step prompting | barrier: needs_prompting (ok)
- [60m | self_help_motor_skills] buttons some buttons -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	48	12	needs_special_supp

C07 — Lucas (14 months)

Diagnosis: Fragile X syndrome

1. Child Profile

Name: Lucas
Age: 14 months (14 months)
Diagnosis: Fragile X syndrome
Daily time: 10 min/day

Key concerns:

- Not walking
- limited babbling
- Sensory sensitivity
- shy socially

2. Parent Input (questions + answers)

- [4m | early_vocalization_and_babbling] makes cooing sounds like ooooo or aahhh -> yes (ok)
- [4m | early_vocalization_and_babbling] makes sounds back when you talk to him -> sometimes | followup: can do it, but only in some situations | barrier: situational inconsistency (ok)
- [4m | receptive_language] turns head towards the sound of your voice -> yes (ok)
- [6m | early_vocalization_and_babbling] blows raspberries or sticks tongue out and blows -> sometimes | followup: can do it, but not consistently yet | barrier: skill emerging (ok)
- [6m | early_vocalization_and_babbling] makes squealing noises -> sometimes | followup: can do it, but only in some situations | barrier: situational inconsistency (ok)
- [6m | early_vocalization_and_babbling] takes turns making sounds with you -> sometimes | followup: can do it, but only in some situations | barrier: situational inconsistency (ok)
- [9m | early_vocalization_and_babbling] makes a lot of different sounds like mamamamama and bababababa -> sometimes | followup: can do it, but not consistently yet | barrier: skill emerging (ok)
- [9m | gestural_communication] lifts arms up to be picked up -> yes (ok)
- [6m | postural_control_and_transitions] leans on hands to support herself when sitting -> yes (ok)
- [6m | postural_control_and_transitions] pushes up with straight arms when on tummy -> yes (ok)
- [6m | postural_control_and_transitions] rolls from tummy to back -> yes (ok)
- [9m | postural_control_and_transitions] gets to sitting position by herself -> yes (ok)

Focus areas:

- Language / Communication
- Movement / Physical
- Social / Emotional

4. Daily Activities

- 1. Sound Imitation Game (5 min) — needs_special_support
Make simple sounds like 'ahh', 'ooo', or 'ee' and encourage Lucas to imitate you. Use a mirror to make it fun and visually engaging. Keep the activity in short bouts and pause for rest if the child is tired.
- 2. Peek-a-Boo with a Twist (5 min) — needs_special_support
Sit in front of Lucas and cover your face with a soft cloth. Then, reveal your face with a big smile and say "Peek-a-boo!" Encourage him to mimic your expression. Repeat several times. Keep ...
- 3. Turn-Taking Sounds (5 min) — needs_special_support
Sit face-to-face with Lucas and take turns making sounds. Start with a sound, then wait for him to respond. Encourage him to make a sound back. Keep the activity in short bouts and pause for rest if the child is tired.
- 4. Facial Expression Imitation (5 min) — needs_special_support
Make different facial expressions (happy, sad, surprised) and encourage Lucas to imitate you. Use a mirror if possible to help him see his own expressions. Keep the activity in short bouts and pause for rest if the child is tired.
- 5. Follow the Sound (5 min) — needs_special_support
Make a sound (like clapping or a gentle bell) and see if Lucas turns his head towards the sound. Praise him when he does. Keep the activity in short bouts and pause for rest if the child is tired.

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Lucas. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

C08 — Emma (2y 8m)

Diagnosis: Suspected childhood apraxia of speech

1. Child Profile

Name: Emma
Age: 2y 8m (32 months)
Diagnosis: Suspected childhood apraxia of speech
Daily time: 10 min/day

Key concerns:

- Very limited speech output
- Uses gestures
- gets frustrated
- inconsistent sounds

2. Parent Input (questions + answers)

- [15m | gestural_communication] points to ask for something or to get help -> yes (ok)
- [15m | expressive_language] tries to say or or two words besides mama or dada like ba for ball or da for dog -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [15m | receptive_language] follows directions given with both a gesture and words for example she gives you a toy when you hold out your hand and say give me the toy -> yes (ok)
- [18m | expressive_language] tries to say three or more words besides mama or dada -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [18m | receptive_language] follows one step directions without any gestures like giving you the toy when you say give it to me -> yes (ok)
- [24m | expressive_language] says at least two words together like more milk -> no | followup: not able yet | barrier: not_able_yet (ok)
- [24m | gestural_communication] uses more gestures than just waving or pointing like blowing a kiss or nodding yes -> yes (ok)
- [24m | receptive_language] points at least two body parts when you ask her to show you -> yes (ok)
- [18m | imitation_and_play_skills] copies you doing chores like sweeping with a broom -> yes (ok)
- [18m | imitation_and_play_skills] plays with toys in a simple way like pushing a toy car -> yes (ok)
- [24m | exploration_and_object_use] holds something in one hand while using the other hand for example holding a container and taking the lid off -> yes (ok)
- [24m | imitation_and_play_skills] plays with more than one toy at the same time like putting toy food on a toy plate -> yes (ok)

3. Genex Output

Domain	Dev age	Gap	Tier

Short feedback: What would you change? | What is missing? | Any concerns?

C09 — Zain (4 years)

Diagnosis: Attention and self-regulation concerns (possible ADHD)

1. Child Profile

Name: Zain
Age: 4 years (48 months)
Diagnosis: Attention and self-regulation concerns (possible ADHD)
Daily time: 10 min/day

Key concerns:

- Very active
- impulsive
- Big emotional reactions
- interrupts

2. Parent Input (questions + answers)

- [30m | concepts_and_following_directions] follows two step instructions like put the toy down and close the door -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [30m | concepts_and_following_directions] shows she knows at least one color like pointing to a red crayon when you ask which one is red -> yes (ok)
- [30m | object_permanence_and_problem_solving] shows simple problem solving skills like standing on a small stool to reach something -> yes (ok)
- [36m | safety_awareness] avoids touching hot objects like the stove when you warn her -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [36m | pre_academic_skills] draws a circle when you show her how -> yes (ok)
- [48m | concepts_and_following_directions] names a few colors or items -> yes (ok)
- [48m | concepts_and_following_directions] tell what comes next in a well known story -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [48m | pre_academic_skills] draws a person with three or more body parts -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [30m | gross_motor_mobility_and_coordination] jumps off the ground with both feet -> yes (ok)
- [30m | self_help_motor_skills] takes some clothes off by himself like loose pants or a jacket -> yes (ok)
- [30m | fine_motor_hand_use] turns book pages one at a time when you read to her -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [36m | self_help_motor_skills] puts on some clothes by himself like loose pants or a jacket -> yes (ok)

C11 — Aria (20 months)

Diagnosis: No diagnosis

1. Child Profile

Name: Aria
Age: 20 months (20 months)
Diagnosis: No diagnosis
Daily time: 10 min/day

Key concerns:

- Only ~10 words
- very active
- good eye contact
- understands well

2. Parent Input (questions + answers)

- [12m | expressive_language] calls parents mama or dada or another special name -> yes (ok)
- [12m | receptive_language] understands no so pauses briefly or stops when you say it -> yes (ok)
- [12m | gestural_communication] waves goodbye -> yes (ok)
- [15m | expressive_language] tries to say or or two words besides mama or dada like ba for ball or da for dog -> yes (ok)
- [15m | receptive_language] follows directions given with both a gesture and words for example she gives you a toy when you hold out your hand and say give me the toy -> yes (ok)
- [15m | receptive_language] looks at a familiar object when you name it -> yes (ok)
- [18m | expressive_language] tries to say three or more words besides mama or dada -> yes (ok)
- [18m | receptive_language] follows one step directions without any gestures like giving you the toy when you say give it to me -> yes (ok)
- [15m | gross_motor_mobility_and_coordination] takes a few steps on her own -> yes (ok)
- [15m | self_help_motor_skills] uses fingers to feed herself some food -> yes (ok)
- [18m | gross_motor_mobility_and_coordination] climbs on and off a couch or chair without help -> yes (ok)
- [18m | self_help_motor_skills] drinks from a cup without a lid and may spill sometimes -> yes (ok)

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	24	0	no_special_support
Social / Emotional	24	0	no_special_support
Language / Communication	17	3	monitor_and_enrich
Cognitive / Adaptive	24	0	no_special_support

Focus areas:

- Language / Communication

4. Daily Activities

1. Follow the Direction (5 min) — monitor_and_enrich
Say a simple direction like 'come here' or 'give me the toy' and encourage Aria to follow it without gestures.
2. Sound Imitation Game (5 min) — monitor_and_enrich
Use different animal sounds and encourage Aria to imitate them. Use sounds she enjoys to keep her engaged.
3. Two-Word Phrases (5 min) — monitor_and_enrich
Encourage Aria to use two-word phrases by modeling them yourself, like 'more juice' or 'big truck'.
4. Gesture Play (5 min) — monitor_and_enrich
Use gestures like waving, blowing kisses, or nodding while saying the words. Encourage Aria to imitate these gestures.
5. Point and Name (7 min) — monitor_and_enrich
Look at a picture book together and ask Aria to point to specific animals or objects while you name them.

5. Summary

This plan prioritizes Language / Communication for Aria. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

4. Daily Activities

- 1. Sound Imitation Game (5 min) — needs_special_support
Make different animal sounds and encourage Mateo to imitate them. Start with simple sounds like 'moo' for a cow or 'meow' for a cat. Use toys or pictures of the animals to make it m...
- 2. Peek-a-Boo Face Play (5 min) — needs_special_support
Sit on the floor facing Mateo. Make different facial expressions (happy, sad, surprised) and encourage him to imitate you. Use a mirror if available to enhance engagement.
- 3. Follow the Gesture (5 min) — needs_special_support
Use simple gestures like waving, pointing, or clapping and encourage Mateo to follow along. You can say 'wave bye-bye' or 'clap your hands' while demonstrating the action.
- 4. Clean-up Time Game (5 min) — needs_special_support
Turn clean-up time into a game. Sing a clean-up song while picking up toys together. Encourage Mateo to help by responding to your prompts.
- 5. Simple Direction Following (5 min) — needs_special_support
Give Mateo simple directions using both words and gestures. For example, say 'Give me the ball' while holding out your hand. Praise him when he follows the direction.

5. Summary

This plan prioritizes Social / Emotional, Language / Communication, Cognitive / Adaptive for Mateo. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? | What is missing? | Any concerns?

C13 — Luna (3y 6m)

Diagnosis: Speech delay

1. Child Profile

Name: Luna
Age: 3y 6m (42 months)
Diagnosis: Speech delay
Daily time: 10 min/day

- Key concerns:**
- Limited speech
 - understands well
 - parents have very limited time for activities

2. Parent Input (questions + answers)

- [24m | expressive_language] says at least two words together like more milk -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [24m | receptive_language] points at least two body parts when you ask her to show you -> yes (ok)
- [24m | receptive_language] points to things in a book when you ask like where is the bear -> yes (ok)
- [30m | expressive_language] name things in a book when you point and ask what is this -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [30m | expressive_language] say two or more words together with one action word like Clean-Up Time together -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [30m | expressive_language] says about 50 words -> no | followup: not able yet | barrier: not_able_yet (ok)
- [36m | expressive_language] ask who or what or where or why questions like where is mommy or where is daddy -> no | followup: not able yet | barrier: not_able_yet (ok)
- [36m | expressive_language] says first name when asked -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [36m | expressive_language] says what action is happening in a picture or book when asked like running or eating or playing -> sometimes | followup: can do it, but not consistently yet | barrier: skill_emerging (ok)
- [24m | social_engagement_and_joint_attention] looks at your face to see how to react in a new situation -> yes (ok)
- [24m | empathy_and_prosocial_behavior] notices when others are hurt or upset like pausing or looking sad when someone is crying -> yes (ok)
- [30m | social_engagement_and_joint_attention] follos simple routines when told like helping to pick up toys when you say it is clean up time -> yes (ok)

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	48	0	no_special_support
Social / Emotional	30	12	needs_special_supp
Language / Communication	24	18	needs_special_supp
Cognitive / Adaptive	36	6	monitor_and_enrich

- Focus areas:**
- Language / Communication
 - Social / Emotional
 - Cognitive / Adaptive

4. Daily Activities

- 1. Body Part Show and Tell (5 min) — needs_special_support**
Ask Luna to point to different body parts on herself or a doll when you name them. For example, say 'Where's your nose?' and encourage her to point.
- 2. Clean-Up Time Together (5 min) — needs_special_support**
At clean-up time, say 'It's clean-up time!' and encourage Luna to help pick up toys. Make it fun by singing a clean-up song together.
- 3. Book Pointing Game (5 min) — needs_special_support**
Choose a picture book and ask Luna to point to specific animals or objects when you ask, like 'Where is the bear?' or 'Show me the cat.'
- 4. Look at Me Game (5 min) — needs_special_support**
Take turns showing each other something fun you can do, like jumping or spinning. Encourage Luna to say 'Look at me!' when it's her turn.
- 5. Two-Word Phrases (5 min) — needs_special_support**
Encourage Luna to use two-word phrases by modeling them. For example, say 'More juice' or 'Big truck' and prompt her to repeat after you.

5. Summary

This plan prioritizes Social / Emotional, Language / Communication, Cognitive / Adaptive for Luna. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

C14 — Ryan (4y 2m)

Diagnosis: No diagnosis

1. Child Profile

Name: Ryan
Age: 4y 2m (50 months)
Diagnosis: No diagnosis
Daily time: 10 min/day

Key concerns:

- Tantrums
- difficulty with transitions
- strong language skills
- social but rigid

2. Parent Input (questions + answers)

- [36m | emotional_regulation] calms down within 10 minutes after you leave her like at childcare drop off -> sometimes | followup: can do it, but not consistently yet | barrier: skill emerging (ok)
- [36m | peer_interaction_and_social_rules] notices other children and joins them to play sometimes | followup: can do it, but only in some situations | barrier: situational inconsistency (ok)
- [48m | peer_interaction_and_social_rules] asks to go play with children if none are around like can I play with Alex -> yes (ok)
- [48m | peer_interaction_and_social_rules] changes behavior based on where she is like plans of worship or library or playground -> sometimes | followup: can do it, but only in some situations | barrier: situational inconsistency (ok)
- [48m | peer_interaction_and_social_rules] likes to be a helper -> yes (ok)
- [36m | expressive_language] ask who or what or where or why questions like where is mommy or where is daddy -> yes (ok)
- [36m | expressive_language] says first name when asked -> yes (ok)
- [36m | expressive_language] says what action is happening in a picture or book when asked like running or eating or playing -> yes (ok)
- [48m | expressive_language] answers simple questions like what is a coat for or what is crayon for -> yes (ok)
- [48m | expressive_language] says sentences with four or more words -> yes (ok)
- [48m | conversation_narrative] says some words from a song or story or nursery rhyme -> yes (ok)
- [36m | safety_awareness] avoids touching hot objects like the stove when you warn her -> yes (ok)

3. Genex Output
