

Genex Advisor Review Packet - Clean Layout

C01 - Noah

Name	Noah	Age (months)	10
Diagnosis	Down syndrome	Daily time	10 min/day
Concern	Not sitting independently yet, Hypotonia, slow feeding, socially engaged		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	4	6	needs_special_support
Social / Emotional	9	1	no_special_support
Language / Communication	5	5	needs_special_support
Cognitive / Adaptive	6	4	monitor_and_enrich

Focus areas

- Movement / Physical
- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

1. Tummy Time with Arm Support (5 min) - needs_special_support
Place Noah on his tummy on a soft surface. Use a rolled towel or small pillow under his arms to help him push up onto his elbows. Encourage him to look around and reach for toys placed just out of reach. Keep the activity in short bouts and pause for rest if the child tires.

2. Sound Imitation (5 min) - needs_special_support
Make different sounds like 'ma', 'ba', and 'da' and encourage Noah to imitate you. Use a mirror to make it more engaging. Keep the activity in short bouts and pause for rest if the child tires.

3. Supported Sitting Practice (5 min) - needs_special_support
Sit Noah on the floor with pillows or cushions around him for support. Encourage him to lean forward and reach for toys placed in front of him. Provide gentle support to help him maintain balance. Keep the activity in short bouts and pause for rest if the child tires.

4. Turn-Taking Sounds (5 min) - needs_special_support
Sit face-to-face with Noah and take turns making sounds. Start with a sound and wait for him to respond before making another sound. Keep the activity in short bouts and pause for rest if the child tires.

5. Toy Grasping and Bringing to Mouth (5 min) - needs_special_support
Give Noah a soft toy that is easy to grasp. Encourage him to bring it to his mouth. You can help guide his hand if needed. This promotes fine motor skills and hand-mouth coordination. Keep the activity in short bouts and pause for rest if the child tires. Keep the child upright and closely supervised. Avoid choking-risk foods and stop if coughing, gagging, or distress occurs.

5. Summary

This plan prioritizes Movement / Physical, Language / Communication, Cognitive / Adaptive for Noah. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C02 - Maya

Name	Maya	Age (months)	18
Diagnosis	No formal diagnosis	Daily time	10 min/day
Concern	No words yet, uses gestures, understands simple commands, good eye contact		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	18	0	no_special_support
Social / Emotional	18	0	no_special_support
Language / Communication	13	5	needs_special_support
Cognitive / Adaptive	15	3	monitor_and_enrich

Focus areas

- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

1. Toy Naming Game (5 min) - needs_special_support
Hold up a familiar toy and say its name clearly. Encourage Maya to look at the toy when you say its name. Repeat with different toys.

2. Block Stacking (5 min) - monitor_and_enrich
Encourage Maya to stack two small blocks. You can model the activity by stacking the blocks yourself first, then let her try. Celebrate her efforts!

3. Follow the Direction (5 min) - needs_special_support
Give Maya a simple one-step direction like 'give me the toy' without gestures. Praise her when she follows the direction.

4. Chore Imitation (5 min) - monitor_and_enrich
Model a simple chore like sweeping with a broom. Hand her a small broom or a toy broom and encourage her to copy your actions.

5. Point and Ask (5 min) - needs_special_support
Place a few toys within reach. Encourage Maya to point to a toy she wants and say 'that one' or another simple word. Respond to her request.

5. Summary

This plan prioritizes Language / Communication, Cognitive / Adaptive for Maya. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C03 - Leo

Name	Leo	Age (months)	26
Diagnosis	Autism spectrum disorder	Daily time	10 min/day
Concern	Limited eye contact and few words, Repetitive play, transitions hard, picky eating		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	24	2	monitor_and_enrich
Social / Emotional	15	11	needs_special_support
Language / Communication	13	13	needs_special_support
Cognitive / Adaptive	24	2	monitor_and_enrich

Focus areas

- Language / Communication
- Social / Emotional
- Movement / Physical

4. Daily Activities

1. Follow the Gesture (5 min) - needs_special_support
Hold out a toy and say, 'Give me the toy.' Encourage Leo to hand it to you. Use gestures to guide him if needed. Keep it short and predictable, offer a simple choice, and stop before frustration escalates. Use lower-noise, lower-clutter materials when possible.

2. Container Play (5 min) - monitor_and_enrich
Provide a container and various small items (like blocks or toys). Encourage Leo to hold the container with one hand while using the other hand to take items in and out. Keep it short and predictable, offer a simple choice, and stop before frustration escalates. Use lower-noise, lower-clutter materials when possible.

3. Point and Ask (5 min) - needs_special_support
Place two toys in front of Leo. Encourage him to point to the one he wants while saying a word like 'car' or 'ball.' Keep it short and predictable, offer a simple choice, and stop before frustration escalates. Use lower-noise, lower-clutter materials when possible.

4. Joint Attention with Toys (5 min) - needs_special_support
Play with a toy that makes noise or has lights. Show Leo how it works, then encourage him to show you the toy when he plays with it. Keep it short and predictable, offer a simple choice, and stop before frustration escalates. Use lower-noise, lower-clutter materials when possible.

5. Name That Object (5 min) - needs_special_support
Show Leo a familiar object and say its name. Encourage him to look at it when you name it. Repeat with different objects. Keep it short and predictable, offer a simple choice, and stop before frustration escalates. Use lower-noise, lower-clutter materials when possible.

5. Summary

This plan prioritizes Language / Communication, Social / Emotional, Movement / Physical for Leo. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C04 - Sofia

Name	Sofia	Age (months)	37
Diagnosis	Prematurity history	Daily time	10 min/day
Concern	Speech hard to understand, Fine motor delay, good comprehension		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	24	13	needs_special_support
Social / Emotional	30	7	needs_special_support
Language / Communication	27	10	needs_special_support
Cognitive / Adaptive	30	7	needs_special_support

Focus areas

- Movement / Physical
- Language / Communication
- Social / Emotional

4. Daily Activities

1. Ball Kicking Fun (5 min) - needs_special_support
Set up a soft ball in a clear space. Encourage Sofia to kick the ball with her foot. You can roll the ball back to her to keep the game going.

2. Clean-Up Time Together (5 min) - needs_special_support
At clean-up time, say 'It's clean-up time!' and encourage Sofia to help pick up toys. Show her how to do it and praise her efforts.

3. Spoon Practice (5 min) - needs_special_support
Provide a bowl of soft food (like yogurt or applesauce) and a spoon. Encourage Sofia to scoop the food and bring it to her mouth, offering help as needed.

4. Look at Me Game (5 min) - needs_special_support
Take turns showing each other something fun you can do, like a silly face or dance move. Encourage Sofia to say 'Look at me!' when it's her turn.

5. Stair Climbing (5 min) - needs_special_support
Find a set of stairs. With support, help Sofia walk up a few steps, holding her hand for balance. Encourage her to place one foot on each step.

5. Summary

This plan prioritizes Movement / Physical, Language / Communication, Social / Emotional for Sofia. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C05 - Ethan

Name	Ethan	Age (months)	54
Diagnosis	Cerebral palsy	Daily time	10 min/day
Concern	Trouble keeping up in preschool, Self-care delays, frequent falls, difficulty with stairs, uses walker sometimes, good cognition		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	30	24	needs_special_support
Social / Emotional	60	0	no_special_support
Language / Communication	60	0	no_special_support
Cognitive / Adaptive	48	6	monitor_and_enrich

Focus areas

- Movement / Physical
- Cognitive / Adaptive

4. Daily Activities

1. Clothing Practice (5 min) - needs_special_support
Provide Ethan with loose clothing items. Encourage him to practice taking off and putting on these items while seated, offering assistance as needed. Use stable support and close adult supervision throughout.

2. Color Sorting (5 min) - monitor_and_enrich
Gather a few colored items (like blocks or toys). Ask Ethan to sort them by color into different containers. You can help him name the colors as he sorts.

3. Book Page Turning (5 min) - needs_special_support
Sit with Ethan and read a book together. Encourage him to turn the pages one at a time, providing hand-over-hand support if necessary. Use stable support and close adult supervision throughout.

4. Counting Steps (5 min) - monitor_and_enrich
While standing at the bottom of a set of stairs, practice counting the steps as Ethan takes them one at a time with support. Encourage him to count aloud.

5. Supported Step-Ups (5 min) - needs_special_support
Using a low step or sturdy box, help Ethan practice stepping up and down while holding onto a stable surface for support. Focus on one foot at a time. Use stable support and close adult supervision throughout.

5. Summary

This plan prioritizes Movement / Physical, Cognitive / Adaptive for Ethan. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C06 - Amina

Name	Amina	Age (months)	60
Diagnosis	Global developmental delay	Daily time	10 min/day
Concern	Learning and routines are hard, Short attention span, follows only simple directions		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	48	12	needs_special_support
Social / Emotional	60	0	no_special_support
Language / Communication	48	12	needs_special_support
Cognitive / Adaptive	30	30	needs_special_support

Focus areas

- Cognitive / Adaptive
- Movement / Physical
- Language / Communication

4. Daily Activities

1. Color Sorting (5 min) - needs_special_support
Gather a few colored items (like blocks or crayons). Ask Amina to sort them by color. For example, say, 'Can you put the red ones here and the blue ones there?' Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

2. Ball Catching Practice (5 min) - needs_special_support
Sit on the floor with Amina and roll a large, soft ball back and forth. Encourage her to catch the ball when you roll it to her. Celebrate her successes! Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

3. Two-Step Instructions (5 min) - needs_special_support
Give Amina simple two-step instructions, such as 'Pick up the toy and put it in the box.' Celebrate her success to encourage her. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

4. Crayon Drawing (5 min) - needs_special_support
Provide Amina with crayons and paper. Encourage her to hold the crayon between her fingers and thumb to make marks on the paper. You can draw simple shapes for her to copy. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Pretend Play with Dolls (5 min) - needs_special_support
Use dolls or stuffed animals to engage in pretend play. For example, feed the doll and encourage Amina to do the same. Ask her questions like, 'What does the doll want to eat?' Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Summary

This plan prioritizes Cognitive / Adaptive, Movement / Physical, Language / Communication for Amina. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C07 - Lucas

Name	Lucas	Age (months)	14
Diagnosis	Fragile X syndrome	Daily time	10 min/day
Concern	Not walking, limited babbling, Sensory sensitivity, shy socially		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	9	5	needs_special_support
Social / Emotional	9	5	needs_special_support
Language / Communication	4	10	needs_special_support
Cognitive / Adaptive	6	8	needs_special_support

Focus areas

- Language / Communication
- Cognitive / Adaptive
- Movement / Physical

4. Daily Activities

1. Sound Imitation Game (5 min) - needs_special_support
Make simple sounds like 'ah', 'oo', or 'ee' and encourage Lucas to imitate you. Use a mirror to make it more engaging. Repeat the sounds together. Keep the activity in short bouts and pause for rest if the child tires. Use lower-noise, lower-clutter materials when possible.

2. Supported Sitting Practice (5 min) - needs_special_support
Place Lucas in a sitting position on a soft surface with cushions around him for support. Encourage him to reach for toys placed just out of reach to promote balance and posture. Keep the activity in short bouts and pause for rest if the child tires. Use lower-noise, lower-clutter materials when possible.

3. Turn-Taking Sounds (5 min) - needs_special_support
Sit facing Lucas and take turns making sounds. Start with a sound and wait for him to respond. Encourage him to make a sound back to you. Keep the activity in short bouts and pause for rest if the child tires. Use lower-noise, lower-clutter materials when possible.

4. Crawling to Toys (5 min) - needs_special_support
Place toys a short distance away from Lucas while he is on his tummy. Encourage him to crawl towards the toys, providing support as needed. Keep the activity in short bouts and pause for rest if the child tires. Use lower-noise, lower-clutter materials when possible.

5. Follow the Sound (5 min) - needs_special_support
Make a sound (like clapping or a gentle noise) and encourage Lucas to turn his head towards you. Praise him when he does. Keep the activity in short bouts and pause for rest if the child tires. Use lower-noise, lower-clutter materials when possible.

5. Summary

This plan prioritizes Language / Communication, Cognitive / Adaptive, Movement / Physical for Lucas. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C08 - Emma

Name	Emma	Age (months)	32
Diagnosis	Suspected childhood apraxia of speech	Daily time	10 min/day
Concern	Very limited speech output, Uses gestures, gets frustrated, inconsistent sounds		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	36	0	no_special_support
Social / Emotional	36	0	monitor_and_enrich
Language / Communication	15	17	needs_special_support
Cognitive / Adaptive	30	2	monitor_and_enrich

Focus areas

- Language / Communication
- Cognitive / Adaptive
- Social / Emotional

4. Daily Activities

1. Follow the Leader with Sounds (5 min) - needs_special_support
Make a fun sound (like a animal noise) and encourage Emma to imitate it. Use gestures to show her how to make the sound. Take turns making sounds together. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

2. Color Sorting (5 min) - monitor_and_enrich
Provide Emma with a mix of colored blocks or crayons. Ask her to sort them by color, saying 'Can you find the red one?' and 'Put the blue one here.' Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

3. Toy Naming Game (5 min) - needs_special_support
Choose a few of Emma's favorite toys. Hold up a toy and say its name clearly. Encourage Emma to repeat the name or point to the toy when you say it. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

4. Two-Step Instructions (5 min) - monitor_and_enrich
Give Emma simple two-step instructions like 'Pick up the toy and put it in the box.' Praise her when she follows through. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Simple Direction Following (5 min) - needs_special_support
Give Emma simple one-step directions like 'give me the ball' or 'come here'. Use gestures to help her understand what to do. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Summary

This plan prioritizes Language / Communication, Cognitive / Adaptive, Social / Emotional for Emma. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C09 - Zain

Name	Zain	Age (months)	48
Diagnosis	Attention and self-regulation concerns (possible ADHD)	Daily time	10 min/day
Concern	Very active, impulsive, Big emotional reactions, interrupts, difficulty following routines, social interest intact		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	48	0	no_special_support
Social / Emotional	48	0	monitor_and_enrich
Language / Communication	48	0	no_special_support
Cognitive / Adaptive	48	0	monitor_and_enrich

Focus areas

- Social / Emotional
- Cognitive / Adaptive

4. Daily Activities

1. Emotion Charades (5 min) - monitor_and_enrich
Take turns acting out different emotions using facial expressions and body language. The other person guesses the emotion. Start with simple emotions like happy, sad, or surprised. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

2. Color Hunt (5 min) - monitor_and_enrich
Ask Zain to find and bring you three items of a specific color around the house. Start with one color and gradually add more as he gets comfortable. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

3. Helping Hands (5 min) - monitor_and_enrich
Choose a simple household task (like sorting laundry or setting the table) and invite Zain to help. Encourage him to talk about what he is doing and how it helps. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

4. Story Sequence Cards (5 min) - monitor_and_enrich
Use simple picture cards from a familiar story. Show Zain the cards and ask him to put them in order. Discuss what happens next in the story. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Story Time with Feelings (5 min) - monitor_and_enrich
Read a short story together and pause to discuss the characters' feelings. Ask Zain how he thinks the characters feel and why. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Summary

This plan prioritizes Social / Emotional, Cognitive / Adaptive for Zain. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C10 - Isla

Name	Isla	Age (months)	44
Diagnosis	SYNGAP1-related disorder	Daily time	10 min/day
Concern	Delayed speech and balance, Attention issues, clumsy gait, limited pretend play		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	24	20	needs_special_support
Social / Emotional	36	8	needs_special_support
Language / Communication	28	16	needs_special_support
Cognitive / Adaptive	30	14	needs_special_support

Focus areas

- Movement / Physical
- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

- 1. Spoon Feeding Practice (5 min)** - needs_special_support

Provide Isla with a bowl of soft food and a spoon. Encourage her to scoop the food and bring it to her mouth. Offer hand-over-hand support if needed. Use stable support and close adult supervision throughout. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.
- 2. Color Sorting (5 min)** - needs_special_support

Gather a few colored objects (like blocks or crayons). Ask Isla to sort them by color into different containers. For example, say, 'Can you put the red ones here and the blue ones there?' Keep it short and predictable, offer a simple choice, and stop before frustration escalates.
- 3. Ball Kicking Fun (5 min)** - needs_special_support

Roll a soft ball towards Isla and encourage her to kick it back to you. Use a large, soft ball to make it easier for her to connect. Use stable support and close adult supervision throughout. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.
- 4. Two-Step Instructions (5 min)** - needs_special_support

Give Isla two simple instructions to follow, such as 'Pick up the toy and put it on the table.' Praise her when she completes both steps. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.
- 5. Walking Up Stairs with Help (5 min)** - needs_special_support

Find a few stairs at home. Hold Isla's hand and help her step up one or two stairs at a time, encouraging her to lift her feet. Use stable support and close adult supervision throughout. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Summary

This plan prioritizes Movement / Physical, Language / Communication, Cognitive / Adaptive for Isla. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness

C11 - Aria

Name	Aria	Age (months)	20
Diagnosis	No diagnosis	Daily time	10 min/day
Concern	Only ~10 words, very active, good eye contact, understands well		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	24	0	no_special_support
Social / Emotional	24	0	no_special_support
Language / Communication	17	3	monitor_and_enrich
Cognitive / Adaptive	24	0	no_special_support

Focus areas

- Language / Communication

4. Daily Activities

1. Follow the Leader (5 min) - monitor_and_enrich
Give Aria simple one-step directions like 'clap your hands' or 'touch your nose' and encourage her to follow. Praise her when she does.

2. Word Imitation Game (5 min) - monitor_and_enrich
Say a word clearly and encourage Aria to repeat it after you. Start with simple words like 'ball' or 'dog'.

3. Gesture Play (5 min) - monitor_and_enrich
Use gestures like waving, blowing kisses, or nodding. Encourage Aria to imitate these gestures while you name them.

4. Two-Word Phrases (5 min) - monitor_and_enrich
Model simple two-word phrases like 'more juice' or 'big truck' and encourage Aria to use them when appropriate.

5. Book Pointing (7 min) - monitor_and_enrich
Read a picture book together and ask Aria to point to specific items, like 'Where is the cat?' or 'Show me the ball.'

5. Summary

This plan prioritizes Language / Communication for Aria. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

C12 - Mateo

Name	Mateo	Age (months)	30
Diagnosis	No formal diagnosis	Daily time	10 min/day
Concern	Good eye contact but no words, lines up toys, responds to name inconsistently		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	30	0	no_special_support
Social / Emotional	18	12	needs_special_support
Language / Communication	12	18	needs_special_support
Cognitive / Adaptive	24	6	needs_special_support

Focus areas

- Language / Communication
- Social / Emotional
- Cognitive / Adaptive

4. Daily Activities

1. Wave Goodbye (3 min) - needs_special_support
Practice waving goodbye together. Say 'bye-bye' and encourage Mateo to wave his hand.

2. Dress-Up Fun (5 min) - needs_special_support
Encourage Mateo to help you dress him by guiding his arms through the sleeves or lifting his feet for shoes. Make it playful by using a favorite toy or stuffed animal to demonstrate.

3. Sound Imitation Game (5 min) - needs_special_support
Make different animal sounds and encourage Mateo to imitate them. Start with simple sounds like 'moo' or 'quack'.

4. Hide and Seek Peek (5 min) - needs_special_support
Play a simple game of hide and seek where you hide briefly and then peek out. Encourage Mateo to look for you and check in with him to see if he can find you.

5. Follow the Gesture (5 min) - needs_special_support
Use gestures to give simple commands, like 'come here' or 'give me a toy', and encourage Mateo to follow them.

5. Summary

This plan prioritizes Language / Communication, Social / Emotional, Cognitive / Adaptive for Mateo. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?

C13 - Luna

Name	Luna	Age (months)	42
Diagnosis	Speech delay	Daily time	10 min/day
Concern	Limited speech, understands well, parents have very limited time for activities		

2. Parent Input (questions + answers)

- Full transcript preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Tier
Movement / Physical	48	0	no_special_support
Social / Emotional	36	6	monitor_and_enrich
Language / Communication	24	18	needs_special_support
Cognitive / Adaptive	36	6	monitor_and_enrich

Focus areas

- Language / Communication
- Social / Emotional
- Cognitive / Adaptive

4. Daily Activities

1. Body Part Pointing (5 min) - needs_special_support
Ask Luna to point to different body parts on herself or on a doll. Start with simple requests like 'Where's your nose?' and gradually include more parts.

2. Emotion Faces Game (5 min) - monitor_and_enrich
Make different facial expressions (happy, sad, surprised) and encourage Luna to imitate them. Take turns making faces and guessing each other's emotions.

3. Two-Word Requests (5 min) - needs_special_support
Practice using two-word phrases by modeling examples like 'more juice' or 'big truck'. Encourage Luna to repeat and use similar phrases when asking for things.

4. Turn-Taking with Toys (5 min) - monitor_and_enrich
Play with a favorite toy that requires taking turns (like a ball or a puzzle). Encourage Luna to wait for her turn and celebrate when she does.

5. Gesture Game (5 min) - needs_special_support
Play a game where you model different gestures (like blowing a kiss or nodding). Encourage Luna to imitate the gestures, praising her efforts.

5. Summary

This plan prioritizes Language / Communication, Social / Emotional, Cognitive / Adaptive for Luna. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

4. Daily Activities

- 1. Transition Countdown (3 min)** - enrich_and_observe
Before transitioning to a new activity, give Ryan a countdown (e.g., 'In 3 minutes, we will clean up'). Use a timer if possible to visually show the countdown. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.
- 2. Emotion Charades (5 min)** - enrich_and_observe
Take turns making faces to show different emotions (happy, sad, surprised). Ryan can imitate your expressions, and you can discuss what makes you feel that way. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.
- 3. Helping Hands (5 min)** - enrich_and_observe
Choose a simple task (like sorting toys or setting the table) and invite Ryan to help. Praise him for his efforts and discuss how helping makes you both feel. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.
- 4. Story Time with Feelings (5 min)** - enrich_and_observe
Read a short story together. Pause to discuss the characters' feelings and ask Ryan how he would feel in similar situations. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.
- 5. Pretend Play Scenarios (5 min)** - enrich_and_observe
Engage in a short pretend play scenario where Ryan can be a teacher or superhero. Encourage him to interact with you in character. Keep it short and predictable, offer a simple choice, and stop before frustration escalates.

5. Summary

This plan prioritizes Social / Emotional for Ryan. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

6. Advisor Review

Rate 1-5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness
Short feedback: What would you change? What is missing? Any concerns?
