

C01 — Noah (10 months)

Diagnosis: Down syndrome

1. Child Profile

Name: Noah
Age: 10 months (10 months)
Diagnosis: Down syndrome
Daily time: 10 min/day

Key concerns:

- Not sitting independently yet
- Hypotonia
- slow feeding
- socially engaged

2. Parent Input (questions + answers)

- [2m] holds head up when on tummy -> sometimes
- [2m] moves both arms and both legs -> yes
- [2m] open hands briefly -> yes
- [4m] bring hands to mouth -> sometimes
- [4m] holds a toy when you put it in his hand -> sometimes
- [4m] holds head steady without support when you are holding him -> sometimes
- [4m] pushes up onto elbows or forearms when on tummy -> sometimes
- [6m] leans on hands to support herself when sitting -> no
- [6m] pushes up with straight arms when on tummy -> no
- [6m] rolls from tummy to back -> sometimes
- [2m] calms down when spoken to or picked up -> yes
- [2m] looks at your face -> yes

Full transcript is preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Severity
Movement / Physical	2	8	moderate
Social / Emotional	2	8	moderate
Language / Communication	2	8	moderate
Cognitive / Adaptive	2	8	moderate

Focus areas:

- Movement / Physical
- Social / Emotional
- Language / Communication

4. Daily Activities

1. Sound Imitation (5 min) — current_or_next

Make different sounds (like animal noises or silly sounds) and encourage Noah to imitate you. Use a playful tone and smile to keep him engaged.

2. Tummy Time with Toys (5 min) — current_or_next

Place Noah on his tummy on a soft surface. Place colorful toys just out of reach to encourage him to lift his head and reach for them.

3. Cooing Time (5 min) — current_or_next

Lie on the floor with Noah and take turns making cooing sounds. Encourage him to respond to your sounds by making his own.

4. Arm and Leg Movements (5 min) — current_or_next

Lay Noah on his back and gently move his arms and legs in a bicycle motion. Encourage him to try moving them on his own.

5. Sound Reaction Game (5 min) — current_or_next

Use a rattle or a musical toy. Shake it or play it while Noah is looking away, then see if he turns his head towards the sound.

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Noah. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

C02 — Maya (18 months)

Diagnosis: No formal diagnosis

1. Child Profile

Name: Maya
Age: 18 months (18 months)
Diagnosis: No formal diagnosis
Daily time: 10 min/day

Key concerns:

- No words yet
- uses gestures
- understands simple commands
- good eye contact

2. Parent Input (questions + answers)

- [12m] drinks from a cup without a lid as you hold it -> yes
- [12m] picks things up between thumb and pointer finger like small bits of food -> yes
- [12m] pulls up to stand -> yes
- [12m] walks holding on to furniture -> not_sure
- [15m] takes a few steps on her own -> not_sure
- [15m] uses fingers to feed herself some food -> not_sure
- [18m] climbs on and off a couch or chair without help -> not_sure
- [18m] drinks from a cup without a lid and may spill sometimes -> not_sure
- [18m] feeds himself with his fingers -> not_sure
- [18m] scribbles -> not_sure
- [9m] is shy or clingy or fearful around strangers -> not_sure
- [9m] looks when you call her name -> not_sure

Full transcript is preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Severity
Movement / Physical	12	6	minimal / mild
Social / Emotional	9	9	moderate
Language / Communication	9	9	moderate
Cognitive / Adaptive	9	9	moderate

Focus areas:

- Social / Emotional
- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

1. Name Calling (3 min) — current

Call Maya's name from another room and see if she looks for you. Reward her with a smile or clap when she responds.

2. Banging Blocks Together (5 min) — current

Provide Maya with two soft blocks. Show her how to bang them together, then encourage her to try it herself.

3. Peek-a-Boo (5 min) — current

Play peek-a-boo by hiding your face behind your hands or a cloth and then revealing yourself. Encourage Maya to do the same.

4. Hide and Seek with a Toy (5 min) — current

While Maya watches, hide a small toy under a blanket. Encourage her to find it by lifting the blanket.

5. Facial Expression Game (5 min) — current

Make different facial expressions (happy, sad, surprised) and encourage Maya to mimic you. Use a mirror to help her see her own expressions.

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Maya. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

C03 — Leo (2y 2m)

Diagnosis: Autism spectrum disorder

1. Child Profile

Name: Leo
Age: 2y 2m (26 months)
Diagnosis: Autism spectrum disorder
Daily time: 10 min/day

Key concerns:

- Limited eye contact and few words
- Repetitive play
- transitions hard
- picky eating

2. Parent Input (questions + answers)

- [15m] takes a few steps on her own -> not_sure
- [15m] uses fingers to feed herself some food -> not_sure
- [18m] climbs on and off a couch or chair without help -> not_sure
- [18m] drinks from a cup without a lid and may spill sometimes -> not_sure
- [18m] feeds himself with his fingers -> not_sure
- [18m] scribbles -> not_sure
- [24m] eats with a spoon -> not_sure
- [24m] kicks a ball -> not_sure
- [24m] runs -> not_sure
- [24m] walks not climbs up a few stairs wih or without help -> not_sure
- [12m] play games with you like pat a cake -> not_sure
- [15m] claps when excited -> not_sure

Full transcript is preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Severity
Movement / Physical	15	11	moderate
Social / Emotional	12	14	moderate
Language / Communication	12	14	moderate
Cognitive / Adaptive	15	11	moderate

Focus areas:

- Social / Emotional
- Language / Communication
- Movement / Physical

4. Daily Activities

1. Excited Clapping (3 min) — current_or_next

Whenever Leo shows excitement, model clapping your hands and encourage him to join in. You can use a favorite toy or activity to elicit excitement.

2. Couch Climbing (5 min) — current_or_next

Encourage Leo to climb on and off the couch or a sturdy chair. You can use pillows to create a safe climbing area.

3. Pat-a-Cake Game (5 min) — current_or_next

Sit facing Leo and sing the 'Pat-a-Cake' song while clapping your hands together. Encourage him to clap along with you.

4. Cup Drinking Practice (5 min) — current_or_next

Fill a cup with a small amount of water and let Leo practice drinking from it. Be ready for spills and encourage him to try again.

5. Copying Play (5 min) — current_or_next

Play with a container and some toys. Take a toy out and encourage Leo to copy you by taking a toy out as well. Use simple phrases like 'Your turn!'

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Leo. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

C04 — Sofia (3y 1m)

Diagnosis: Prematurity history

1. Child Profile

Name: Sofia
Age: 3y 1m (37 months)
Diagnosis: Prematurity history
Daily time: 10 min/day

Key concerns:

- Speech hard to understand
- Fine motor delay
- good comprehension

2. Parent Input (questions + answers)

- [24m] eats with a spoon -> with_help
- [24m] kicks a ball -> not_sure
- [24m] runs -> not_sure
- [24m] walks not climbs up a few stairs wih or without help -> not_sure
- [30m] jumps off the ground with both feet -> not_sure
- [30m] takes some clothes off by himself like loose pants or an open jacket -> not_sure
- [30m] turns book pages one at a time when you read to her -> not_sure
- [30m] uses hands to twist things like turning doorknobs or unscrewing lids -> not_sure
- [36m] puts on some clothes by himself like loose pants or a jacket -> not_sure
- [36m] strings items together like large beads or macaroni -> not_sure
- [36m] uses a fork -> not_sure
- [24m] looks at your face to see how to react in a new situation -> not_sure

Full transcript is preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Severity
Movement / Physical	24	13	moderate
Social / Emotional	24	13	moderate
Language / Communication	18	19	significant
Cognitive / Adaptive	24	13	moderate

Focus areas:

- Language / Communication
- Movement / Physical
- Social / Emotional

4. Daily Activities

- 1. Body Part Show and Tell (5 min) — current_or_next**
Ask Sofia to show you different body parts like 'Where's your nose?' or 'Show me your feet.'
Celebrate her responses!
- 2. Emotion Faces Game (5 min) — current_or_next**
Make different facial expressions (happy, sad, surprised) and encourage Sofia to mimic them.
Talk about what each expression means.
- 3. Gesture Play (5 min) — current_or_next**
Play a game where you model different gestures like blowing a kiss or nodding. Encourage Sofia to imitate you.
- 4. Clean Up Time (5 min) — current_or_next**
At the end of playtime, say 'It's clean-up time!' and help Sofia pick up toys together. Encourage her to follow your lead.
- 5. Two-Word Requests (5 min) — current_or_next**
During snack time, encourage Sofia to use two words together, like 'more juice' or 'want cookie.'
Prompt her gently if needed.

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Sofia. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

C05 — Ethan (4y 6m)

Diagnosis: Cerebral palsy

1. Child Profile

Name: Ethan
Age: 4y 6m (54 months)
Diagnosis: Cerebral palsy
Daily time: 10 min/day

Key concerns:

- Trouble keeping up in preschool
- Self-care delays
- frequent falls
- difficulty with stairs

2. Parent Input (questions + answers)

- [24m] eats with a spoon -> not_sure
- [24m] kicks a ball -> not_sure
- [24m] runs -> not_sure
- [24m] walks not climbs up a few stairs wih or without help -> not_sure
- [30m] jumps off the ground with both feet -> not_sure
- [30m] takes some clothes off by himself like loose pants or an open jacket -> not_sure
- [30m] turns book pages one at a time when you read to her -> not_sure
- [30m] uses hands to twist things like turning doorknobs or unscrewing lids -> not_sure
- [36m] puts on some clothes by himself like loose pants or a jacket -> not_sure
- [36m] strings items together like large beads or macaroni -> not_sure
- [36m] uses a fork -> not_sure
- [36m] calms down within 10 minutes after you leave her like at childcare drop off -> not_sure

Full transcript is preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Severity
Movement / Physical	24	30	significant
Social / Emotional	36	18	moderate
Language / Communication	36	18	moderate
Cognitive / Adaptive	30	24	significant

Focus areas:

- Movement / Physical
- Cognitive / Adaptive
- Social / Emotional

4. Daily Activities

- 1. Spoon Practice (5 min) — current_or_next**
Give Ethan a bowl of soft food and a spoon. Encourage him to eat independently while you supervise. Offer help as needed.
- 2. Emotion Charades (5 min) — current**
Take turns acting out different emotions (happy, sad, angry) while the other guesses. Discuss what makes you feel each emotion.
- 3. Jumping Fun (5 min) — current_or_next**
Create a safe space with soft mats or cushions. Encourage Ethan to jump off the ground with both feet, celebrating each jump.
- 4. Calm Down Corner (5 min) — current**
Create a calm down space with pillows and soft toys. Practice going there together when feeling upset, and talk about how to calm down.
- 5. Kick the Ball (7 min) — current_or_next**
Set up a soft ball in a safe area. Encourage Ethan to kick the ball towards a target, like a box or a wall.

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Ethan. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

C06 — Amina (5 years)

Diagnosis: Global developmental delay

1. Child Profile

Name: Amina
Age: 5 years (60 months)
Diagnosis: Global developmental delay
Daily time: 10 min/day

Key concerns:

- Learning and routines are hard
- Short attention span
- follows only simple directions

2. Parent Input (questions + answers)

- [48m] catches a large ball most of the times -> not_sure
- [48m] holds crayon or pencil between fingers and thumb not fist -> not_sure
- [48m] serves herself food or pours water with adult supervision -> not_sure
- [48m] unbuttons some buttons -> not_sure
- [60m] buttons some buttons -> not_sure
- [60m] hops on one foot -> not_sure
- [48m] asks to go play with children if none are around like can I play with Alex -> not_sure
- [48m] avoids danger like not jumping from tall heights at the playground -> not_sure
- [48m] changes behavior based on where she is like place of worship or library or playground -> not_sure
- [48m] comforts others who are hurt or sad like hugging a crying friend -> not_sure
- [60m] does simple chores at home like matching socks or cleaning the table after eating -> not_sure
- [60m] follows rules or takesake turns when playing games with other children -> not_sure

Full transcript is preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Severity
Movement / Physical	48	12	moderate
Social / Emotional	48	12	moderate
Language / Communication	48	12	moderate
Cognitive / Adaptive	24	36	significant

Focus areas:

- Cognitive / Adaptive
- Movement / Physical
- Social / Emotional

4. Daily Activities

1. Container Lid Play (5 min) — current

Give Amina a container with a lid and some small toys. Encourage her to hold the container in one hand while using the other hand to take the lid off and put the toys inside.

2. Playdate Invitation (5 min) — next

Encourage Amina to ask a neighbor or friend to play. Help her formulate the question, like 'Can I play with Alex?'

3. Color Sorting (5 min) — current

Provide Amina with a set of colored blocks or crayons. Ask her to point to or hand you a specific color when you name it, like 'Can you show me the blue one?'

4. Comforting Friends (5 min) — current

Use dolls or stuffed animals to role-play comforting a sad character. Encourage Amina to hug or talk to the character.

5. Two-Step Instructions Game (5 min) — next

Play a game where you give Amina two simple instructions to follow, such as 'Put the toy down and clap your hands.'

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Amina. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

C07 — Lucas (14 months)

Diagnosis: Fragile X syndrome

1. Child Profile

Name: Lucas
Age: 14 months (14 months)
Diagnosis: Fragile X syndrome
Daily time: 10 min/day

Key concerns:

- Not walking
- limited babbling
- Sensory sensitivity
- shy socially

2. Parent Input (questions + answers)

- [4m] bring hands to mouth -> not_sure
- [4m] holds a toy when you put it in his hand -> not_sure
- [4m] holds head steady without support when you are holding him -> not_sure
- [4m] pushes up onto elbows or forearms when on tummy -> not_sure
- [6m] leans on hands to support herself when sitting -> not_sure
- [6m] pushes up with straight arms when on tummy -> not_sure
- [6m] rolls from tummy to back -> not_sure
- [9m] gets to sitting position by herself -> not_sure
- [9m] moves things from one hand to her other hand -> not_sure
- [9m] sits without support -> not_sure
- [9m] uses fingers to rake food towards himself -> not_sure
- [2m] calms down when spoken to or picked up -> not_sure

Domain	Dev age	Gap	Severity
Movement / Physical	4	10	moderate
Social / Emotional	2	12	moderate
Language / Communication	4	10	moderate
Cognitive / Adaptive	4	10	moderate

Focus areas:

- Social / Emotional
- Movement / Physical
- Language / Communication

4. Daily Activities

- 1. Happy Greetings (3 min) — current_or_next**
Practice greeting Lucas with a big smile and a cheerful voice when you enter the room. Observe his reaction and encourage him to smile back.
- 2. Cooing Back and Forth (5 min) — current_or_next**
Sit face-to-face with Lucas. Make cooing sounds like 'oooo' or 'aahhh' and encourage him to mimic you. Wait for him to respond, then repeat the sounds back to him.
- 3. Face Time (5 min) — current_or_next**
Sit in front of Lucas and make different facial expressions. Encourage him to look at your face and mimic your expressions. Use a mirror if available.
- 4. Sound Turn-Taking (5 min) — current_or_next**
Take turns making sounds with Lucas. You can squeal, clap, or make funny noises. Encourage him to imitate you and respond to your sounds.
- 5. Silly Sounds (5 min) — current_or_next**
Make silly sounds or noises to get Lucas's attention. Pause to see if he responds with sounds or looks your way.

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Lucas. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

C08 — Emma (2y 8m)

Diagnosis: Suspected childhood apraxia of speech

1. Child Profile

Name: Emma

Age: 2y 8m (32 months)

Diagnosis: Suspected childhood apraxia of speech

Daily time: 10 min/day

Key concerns:

- Very limited speech output
- Uses gestures
- gets frustrated
- inconsistent sounds

2. Parent Input (questions + answers)

- [18m] climbs on and off a couch or chair without help -> not_sure
- [18m] drinks from a cup without a lid and may spill sometimes -> not_sure
- [18m] feeds himself with his fingers -> not_sure
- [18m] scribbles -> not_sure
- [24m] eats with a spoon -> not_sure
- [24m] kicks a ball -> not_sure
- [24m] runs -> not_sure
- [24m] walks not climbs up a few stairs wih or without help -> not_sure
- [30m] jumps off the ground with both feet -> not_sure
- [30m] takes some clothes off by himself like loose pants or an open jacket -> not_sure
- [30m] turns book pages one at a time when you read to her -> not_sure
- [30m] uses hands to twist things like turning doorknobs or unscrewing lids -> not_sure

Domain	Dev age	Gap	Severity
Movement / Physical	18	14	moderate
Social / Emotional	18	14	moderate
Language / Communication	12	20	significant
Cognitive / Adaptive	18	14	moderate

Focus areas:

- Language / Communication
- Movement / Physical
- Social / Emotional

4. Daily Activities

1. Wave Goodbye (3 min) — current_or_next

Practice waving goodbye during daily routines. Use a toy or a family member to model waving and encourage Emma to join in.

2. Washing Hands Together (3 min) — current_or_next

Make handwashing fun by singing a short song while you wash Emma's hands together. Encourage her to hold out her hands for you.

3. Name Game (5 min) — current_or_next

Sit with Emma and look at family photos. Point to each person and say their name. Encourage Emma to repeat or gesture to indicate who she recognizes.

4. Dress-Up Fun (5 min) — current_or_next

Let Emma help you dress by guiding her to push her arm through a sleeve or lift her foot for a shoe. Make it playful by using a favorite stuffed animal to dress up too.

5. Follow the Gesture (5 min) — current_or_next

Use simple gestures paired with words. For example, say 'come here' while gesturing for her to come. Encourage her to follow your gesture.

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Emma. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

Language / Communication	18	26	significant
Cognitive / Adaptive	18	26	significant

Focus areas:

- Language / Communication
- Cognitive / Adaptive
- Movement / Physical

4. Daily Activities

1. Body Parts Game (5 min) — current_or_next

Ask Isla to show you different body parts by saying, 'Where's your nose?' or 'Show me your feet!'. Start with familiar body parts and gradually introduce new ones.

2. Spoon Practice (5 min) — current_or_next

Provide Isla with a bowl of soft food (like yogurt or applesauce) and a spoon. Encourage her to scoop and eat independently. Offer help if needed, but let her try on her own.

3. Simple Directions (5 min) — current_or_next

Give Isla simple one-step directions like 'Come here!' or 'Give me the ball!'. Encourage her to follow without gestures.

4. Ball Kicking Fun (5 min) — current_or_next

Set up a soft ball in a safe space. Encourage Isla to kick the ball back and forth with you. Start by rolling it to her and let her kick it back.

5. Gesture Play (5 min) — current_or_next

Play a game where you model different gestures like blowing a kiss or nodding. Encourage Isla to imitate you and use gestures during play.

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Isla. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

3. Genex Output

Domain	Dev age	Gap	Severity
Movement / Physical	15	5	minimal / mild
Social / Emotional	15	5	minimal / mild
Language / Communication	15	5	minimal / mild
Cognitive / Adaptive	15	5	minimal / mild

Focus areas:

- Movement / Physical
- Social / Emotional
- Language / Communication

4. Daily Activities

1. Toy Naming Game (5 min) — current_or_next

Hold up a familiar toy and say its name. Encourage Aria to look at the toy when you name it. Repeat with different toys.

2. Couch Climbing (5 min) — current_or_next

Encourage Aria to climb on and off the couch safely. You can place soft cushions on the floor for safety.

3. Follow the Direction (5 min) — next

Give a simple one-step direction like 'give me the ball' without gestures. Praise her when she follows the direction.

4. Cup Drinking Practice (5 min) — current_or_next

Fill a cup with a small amount of water and let Aria practice drinking from it. Expect some spills!

5. Point and Ask (5 min) — current_or_next

Place a few toys out of reach. Encourage Aria to point to a toy she wants and say 'that' or 'give.'

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Aria. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness

Short feedback: What would you change? | What is missing? | Any concerns?

C12 — Mateo (2y 6m)

Diagnosis: No formal diagnosis

1. Child Profile

Name: Mateo
Age: 2y 6m (30 months)
Diagnosis: No formal diagnosis
Daily time: 10 min/day

Key concerns:

- Good eye contact but no words
- lines up toys
- responds to name inconsistently

2. Parent Input (questions + answers)

- [18m] climbs on and off a couch or chair without help -> not_sure
- [18m] drinks from a cup without a lid and may spill sometimes -> not_sure
- [18m] feeds himself with his fingers -> not_sure
- [18m] scribbles -> not_sure
- [24m] eats with a spoon -> not_sure
- [24m] kicks a ball -> not_sure
- [24m] runs -> not_sure
- [24m] walks not climbs up a few stairs wih or without help -> not_sure
- [30m] jumps off the ground with both feet -> not_sure
- [30m] takes some clothes off by himself like loose pants or an open jacket -> not_sure
- [30m] turns book pages one at a time when you read to her -> not_sure
- [30m] uses hands to twist things like turning doorknobs or unscrewing lids -> not_sure

Full transcript is preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Severity
Movement / Physical	18	12	moderate
Social / Emotional	18	12	moderate
Language / Communication	12	18	moderate
Cognitive / Adaptive	18	12	moderate

Focus areas:

- Language / Communication
- Movement / Physical
- Social / Emotional

4. Daily Activities

1. Bye-Bye Wave (3 min) — current_or_next

Practice waving bye-bye together. Encourage Mateo to wave when you say 'bye-bye' to toys or family members.

2. Dress-Up Fun (5 min) — current_or_next

Let Mateo help you dress him by guiding his arms through the sleeves of a shirt or lifting his feet for shoes. Make it playful by using a favorite toy or character as a model.

3. Name Game (5 min) — current_or_next

Sit with Mateo and hold up a picture of a family member or a favorite toy. Say the name clearly and encourage him to repeat it. If he doesn't, model it a few times and encourage him to point...

4. Hide and Seek Glance (5 min) — current_or_next

Play a simple game of hide and seek where you hide briefly and then peek out. Encourage Mateo to look for you and check in with him to see if he is looking.

5. Follow the Gesture (5 min) — current_or_next

Give Mateo simple directions using both a gesture and words, like 'come here' while waving your hand. Praise him when he follows the direction.

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Mateo. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

C13 — Luna (3y 6m)

Diagnosis: Speech delay

1. Child Profile

Name: Luna

Age: 3y 6m (42 months)

Diagnosis: Speech delay

Daily time: 10 min/day

Key concerns:

- Limited speech
- understands well
- parents have very limited time for activities

2. Parent Input (questions + answers)

- [30m] jumps off the ground with both feet -> not_sure
- [30m] takes some clothes off by himself like loose pants or an open jacket -> not_sure
- [30m] turns book pages one at a time when you read to her -> not_sure
- [30m] uses hands to twist things like turning doorknobs or unscrewing lids -> not_sure
- [36m] puts on some clothes by himself like loose pants or a jacket -> not_sure
- [36m] strings items together like large beads or macaroni -> not_sure
- [36m] uses a fork -> not_sure
- [48m] catches a large ball most of the times -> not_sure
- [48m] holds crayon or pencil between fingers and thumb not fist -> not_sure
- [48m] serves herself food or pours water with adult supervision -> not_sure
- [48m] unbuttons some buttons -> not_sure
- [24m] looks at your face to see how to react in a new situation -> not_sure

Full transcript is preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Severity
Movement / Physical	30	12	moderate
Social / Emotional	24	18	moderate
Language / Communication	24	18	moderate
Cognitive / Adaptive	24	18	moderate

Focus areas:

- Social / Emotional
- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

1. Look at Me! (3 min) — current_or_next

Encourage Luna to show you something she can do (like a dance move or a drawing) and say 'Look at me!' when she does.

2. Toy Sorting (5 min) — current_or_next

Gather a few different toys of various colors. Ask Luna to sort them by color into different containers. You can help her by naming the colors as she sorts.

3. Emotion Faces (5 min) — current_or_next

Make different facial expressions (happy, sad, surprised) and encourage Luna to mimic them. Talk about what each face means.

4. Two-Step Instructions (5 min) — current_or_next

Give Luna simple two-step instructions, like 'Pick up the ball and put it in the box.' Praise her when she follows the instructions.

5. Clean Up Time (5 min) — current_or_next

At the end of playtime, say 'It's clean-up time!' and guide Luna to help put away toys. Praise her for helping.

5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Luna. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.

C14 — Ryan (4y 2m)

Diagnosis: No diagnosis

1. Child Profile

Name: Ryan
Age: 4y 2m (50 months)
Diagnosis: No diagnosis
Daily time: 10 min/day

Key concerns:

- Tantrums
- difficulty with transitions
- strong language skills
- social but rigid

2. Parent Input (questions + answers)

- [48m] catches a large ball most of the times -> not_sure
- [48m] holds crayon or pencil between fingers and thumb not fist -> not_sure
- [48m] serves herself food or pours water with adult supervision -> not_sure
- [48m] unbuttons some buttons -> not_sure
- [60m] buttons some buttons -> not_sure
- [60m] hops on one foot -> not_sure
- [36m] calms down within 10 minutes after you leave her like at childcare drop off -> not_sure
- [36m] notices other children and joins them to play -> not_sure
- [48m] asks to go play with children if none are around like can I play with Alex -> not_sure
- [48m] avoids danger like not jumping from tall heights at the playground -> not_sure
- [48m] changes behavior based on where she is like place of worship or library or playground -> not_sure
- [48m] comforts others who are hurt or sad like hugging a crying friend -> not_sure

Full transcript is preserved in JSON output.

3. Genex Output

Domain	Dev age	Gap	Severity
Movement / Physical	48	2	minimal / mild
Social / Emotional	36	14	moderate
Language / Communication	36	14	moderate
Cognitive / Adaptive	36	14	moderate

Focus areas:

- Social / Emotional
- Language / Communication
- Cognitive / Adaptive

4. Daily Activities

1. Who Am I? (5 min) — current_or_next

Ask Ryan to tell you his first name when you say, 'Who are you?'. Then, ask him to ask you the same question.

2. Emotion Charades (5 min) — current_or_next

Take turns acting out different emotions (happy, sad, angry) while the other guesses. Discuss what makes you feel that way.

3. Question Time (5 min) — current_or_next

Take turns asking each other simple questions. Start with questions like 'What is a coat for?' or 'What do we use a crayon for?'.

4. Transition Countdown (5 min) — current

Use a timer to help Ryan transition between activities. Explain what will happen next and set the timer for 5 minutes.

5. Picture Storytime (7 min) — current_or_next

Look at a picture book together. Ask Ryan what action is happening in different pictures, like 'What is he doing?' or 'What is she eating?'.

5. Summary

This plan prioritizes Social / Emotional, Language / Communication, Cognitive / Adaptive for Ryan. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed in the interview.
