

# C01 — Noah (10 months)

Diagnosis: Down syndrome

## 1. Child Profile

Name: Noah  
Age: 10 months (10 months)  
Diagnosis: Down syndrome  
Daily time: 10 min/day

**Key concerns:**

- Not sitting independently yet
- Hypotonia
- slow feeding
- socially engaged

## 2. Parent Input (questions + answers)

- [4m] bring hands to mouth -> sometimes (ok)
- [4m] holds a toy when you put it in his hand -> yes (ok)
- [4m] holds head steady without support when you are holding him -> sometimes (ok)
- [6m] leans on hands to support herself when sitting -> sometimes (ok)
- [6m] pushes up with straight arms when on tummy -> sometimes (ok)
- [6m] rolls from tummy to back -> sometimes (ok)
- [9m] gets to sitting position by herself -> no (ok)
- [9m] moves things from one hand to her other hand -> sometimes (ok)
- [9m] sits without support -> no (ok)
- [4m] chuckles when you try to make him laugh but not yet a full laugh -> yes (ok)
- [4m] looks at you moves or makes sounds to get or keep you attention -> yes (ok)
- [4m] smiles on his own to get your attention -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 4       | 6   | needs_special_supp |
| Social / Emotional       | 9       | 1   | no_special_support |
| Language / Communication | 6       | 4   | monitor_and_enrich |
| Cognitive / Adaptive     | 6       | 4   | monitor_and_enrich |

**Focus areas:**

- Movement / Physical
- Language / Communication
- Cognitive / Adaptive

## 4. Daily Activities

- 1. Tummy Time with Toys (5 min) — needs\_special\_support**  
Place Noah on his tummy on a soft surface. Place colorful toys just out of reach to encourage him to push up onto his elbows or forearms to reach for them.
- 2. Sound Imitation Game (5 min) — monitor\_and\_enrich**  
Make different sounds like 'ma', 'ba', and 'ah' and encourage Noah to imitate you. Use exaggerated facial expressions to engage him.
- 3. Supported Sitting Practice (5 min) — needs\_special\_support**  
Sit Noah on the floor with pillows around him for support. Encourage him to lean on his hands for balance while you place toys in front of him.
- 4. Gesture Play (5 min) — monitor\_and\_enrich**  
Use simple gestures like waving or clapping and say the words associated with them. Encourage Noah to mimic the gestures while saying the words.
- 5. Hand-to-Mouth Play (5 min) — needs\_special\_support**  
Give Noah soft toys or safe objects to hold and encourage him to bring them to his mouth. This helps strengthen his grasp and coordination.

## 5. Summary

This plan prioritizes Movement / Physical, Language / Communication, Cognitive / Adaptive for Noah. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

## 6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness  
Short feedback: What would you change? | What is missing? | Any concerns?

# C02 — Maya (18 months)

Diagnosis: No formal diagnosis

## 1. Child Profile

Name: Maya  
Age: 18 months (18 months)  
Diagnosis: No formal diagnosis  
Daily time: 10 min/day

### Key concerns:

- No words yet
- uses gestures
- understands simple commands
- good eye contact

## 2. Parent Input (questions + answers)

- [12m] drinks from a cup without a lid as you hold it -> sometimes (ok)
- [12m] picks things up between thumb and pointer finger like small bits of food -> yes (ok)
- [12m] pulls up to stand -> yes (ok)
- [15m] takes a few steps on her own -> yes (ok)
- [15m] uses fingers to feed herself some food -> yes (ok)
- [18m] climbs on and off a couch or chair without help -> yes (ok)
- [18m] drinks from a cup without a lid and may spill sometimes -> sometimes (ok)
- [18m] feeds himself with his fingers -> yes (ok)
- [12m] play games with you like pat a cake -> yes (ok)
- [15m] claps when excited -> yes (ok)
- [15m] copies other children while playing like taking toys out of a container when another child does -> yes (ok)
- [15m] hugs stuffed doll or other toy -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 18      | 0   | no_special_support |
| Social / Emotional       | 18      | 0   | no_special_support |
| Language / Communication | 15      | 3   | monitor_and_enrich |
| Cognitive / Adaptive     | 18      | 0   | no_special_support |

### Focus areas:

- Language / Communication

## 4. Daily Activities

### 1. Name That Toy (5 min) — monitor\_and\_enrich

Hold up a familiar toy and say its name clearly. Encourage Maya to look at the toy when you name it. You can also ask her to point to the toy when you say its name.

### 2. Follow the Direction (5 min) — monitor\_and\_enrich

Give Maya a simple one-step direction like 'give me the ball' without using gestures. Encourage her to respond by handing you the toy.

### 3. Sound Imitation Game (5 min) — monitor\_and\_enrich

Make simple sounds (like animal noises) and encourage Maya to imitate them. Use animals she knows, like a dog (bark) or cat (meow).

### 4. Point and Ask (7 min) — monitor\_and\_enrich

Place a few toys out of reach. Encourage Maya to point at the toy she wants and say a sound or word. Respond to her request by giving her the toy.

### 5. Story Time with Sounds (10 min) — monitor\_and\_enrich

Read a short picture book with animals or objects. Encourage Maya to make sounds or point to pictures as you read. Pause to let her respond.

## 5. Summary

This plan prioritizes Language / Communication for Maya. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

## 6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness  
Short feedback: What would you change? | What is missing? | Any concerns?

# C03 — Leo (2y 2m)

Diagnosis: Autism spectrum disorder

## 1. Child Profile

Name: Leo  
Age: 2y 2m (26 months)  
Diagnosis: Autism spectrum disorder  
Daily time: 10 min/day

### Key concerns:

- Limited eye contact and few words
- Repetitive play
- transitions hard
- picky eating

## 2. Parent Input (questions + answers)

- [15m] takes a few steps on her own -> yes (ok)
- [15m] uses fingers to feed herself some food -> yes (ok)
- [18m] climbs on and off a couch or chair without help -> yes (ok)
- [18m] drinks from a cup without a lid and may spill sometimes -> yes (ok)
- [18m] feeds himself with his fingers -> yes (ok)
- [24m] eats with a spoon -> sometimes (ok)
- [24m] kicks a ball -> yes (ok)
- [24m] runs -> yes (ok)
- [12m] play games with you like pat a cake -> no (ok)
- [15m] claps when excited -> yes (ok)
- [15m] copies other children while playing like taking toys out of a container when another child does -> no (ok)
- [15m] hugs stuffed doll or other toy -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 24      | 2   | monitor_and_enrich |
| Social / Emotional       | 15      | 11  | needs_special_supp |
| Language / Communication | 12      | 14  | needs_special_supp |
| Cognitive / Adaptive     | 24      | 2   | monitor_and_enrich |

### Focus areas:

- Language / Communication
- Social / Emotional
- Movement / Physical

## 4. Daily Activities

### 1. Wave Goodbye (3 min) — needs\_special\_support

Practice waving goodbye at different times, like when leaving a room or ending a play session. Encourage Leo to wave back.

### 2. Excited Clapping (5 min) — needs\_special\_support

Play a fun song and encourage Leo to clap along with you when he feels excited. You can encourage clapping and show facial expressions of joy.

### 3. Sound Imitation Game (5 min) — needs\_special\_support

Make different animal sounds and encourage Leo to imitate them. Start with simple sounds like 'moo' or 'meow'.

### 4. Hugging Time (5 min) — needs\_special\_support

Select a stuffed toy and encourage Leo to hug it. Then, model hugging him and encourage him to hug you back, promoting affection and connection.

### 5. Point and Ask (5 min) — needs\_special\_support

Place a few toys in front of Leo. Encourage him to point to a toy he wants and say its name or make a sound.

## 5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Leo. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

## 6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness

Short feedback: What would you change? | What is missing? | Any concerns?

# C04 — Sofia (3y 1m)

Diagnosis: Prematurity history

## 1. Child Profile

Name: Sofia  
Age: 3y 1m (37 months)  
Diagnosis: Prematurity history  
Daily time: 10 min/day

### Key concerns:

- Speech hard to understand
- Fine motor delay
- good comprehension

## 2. Parent Input (questions + answers)

- [24m] eats with a spoon -> sometimes (ok)
- [24m] kicks a ball -> yes (ok)
- [24m] runs -> yes (ok)
- [30m] jumps off the ground with both feet -> yes (ok)
- [30m] takes some clothes off by himself like loose pants or an open jacket -> sometimes (ok)
- [30m] turns book pages one at a time when you read to her -> sometimes (ok)
- [36m] puts on some clothes by himself like loose pants or a jacket -> with\_help (ok)
- [36m] strings items together like large beads or macaroni -> with\_help (ok)
- [36m] uses a fork -> sometimes (ok)
- [24m] looks at your face to see how to react in a new situation -> yes (ok)
- [24m] notices when others are hurt or upset like pausing or looking sad when someone is crying -> yes (ok)
- [30m] follos simple routines when told like helping to pick up toys when you say it is clean up time -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 24      | 13  | needs_special_supp |
| Social / Emotional       | 36      | 1   | no_special_support |
| Language / Communication | 30      | 7   | needs_special_supp |
| Cognitive / Adaptive     | 30      | 7   | needs_special_supp |

### Focus areas:

- Movement / Physical
- Language / Communication
- Cognitive / Adaptive

## 4. Daily Activities

### 1. Spoon Practice (5 min) — needs\_special\_support

Give Sofia a bowl with some soft food (like yogurt or mashed bananas) and a spoon. Encourage her to scoop and eat independently, offering help as needed.

### 2. Color Sorting (5 min) — needs\_special\_support

Gather a few colored items (like blocks or crayons). Ask Sofia to sort them by color, saying 'Can you put all the red ones here?' and 'Now, can you find the blue ones?'

### 3. Stair Climbing (5 min) — needs\_special\_support

Supervise Sofia as she walks up and down a few stairs. Encourage her to hold onto the railing or your hand for support, focusing on her balance and strength.

### 4. Two-Step Instructions (5 min) — needs\_special\_support

Give Sofia two-step instructions like 'Pick up the toy and put it in the box.' Praise her when she follows through.

### 5. Ball Kicking (7 min) — needs\_special\_support

Set up a soft ball in a safe space. Encourage Sofia to kick the ball towards a target, like a box or a wall. Celebrate her attempts and encourage her to try again.

## 5. Summary

This plan prioritizes Movement / Physical, Language / Communication, Cognitive / Adaptive for Sofia. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

## 6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness  
Short feedback: What would you change? | What is missing? | Any concerns?

# C05 — Ethan (4y 6m)

Diagnosis: Cerebral palsy

## 1. Child Profile

Name: Ethan  
Age: 4y 6m (54 months)  
Diagnosis: Cerebral palsy  
Daily time: 10 min/day

### Key concerns:

- Trouble keeping up in preschool
- Self-care delays
- frequent falls
- difficulty with stairs

## 2. Parent Input (questions + answers)

- [24m] eats with a spoon -> with\_help (ok)
- [24m] kicks a ball -> no (ok)
- [24m] runs -> no (ok)
- [30m] jumps off the ground with both feet -> no (ok)
- [30m] takes some clothes off by himself like loose pants or an open jacket -> with\_help (ok)
- [30m] turns book pages one at a time when you read to her -> with\_help (ok)
- [36m] puts on some clothes by himself like loose pants or a jacket -> with\_help (ok)
- [36m] strings items together like large beads or macaroni -> with\_help (ok)
- [36m] uses a fork -> with\_help (ok)
- [36m] calms down within 10 minutes after you leave her like at childcare drop off -> yes (ok)
- [36m] notices other children and joins them to play -> yes (ok)
- [48m] asks to go play with children if none are around like can I play with Alex -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 24      | 30  | needs_special_supp |
| Social / Emotional       | 60      | 0   | no_special_support |
| Language / Communication | 60      | 0   | no_special_support |
| Cognitive / Adaptive     | 48      | 6   | monitor_and_enrich |

### Focus areas:

- Movement / Physical
- Cognitive / Adaptive

## 4. Daily Activities

- Spoon Practice (5 min) — needs\_special\_support**  
Provide Ethan with a bowl of soft food and a spoon. Encourage him to scoop and eat independently, offering guidance as needed.
- Color Hunt (5 min) — monitor\_and\_enrich**  
Go on a color hunt around the house. Ask Ethan to find objects of a specific color and name them as he finds them.
- Ball Kicking (5 min) — needs\_special\_support**  
Set up a soft ball in a safe space. Encourage Ethan to kick the ball forward, using his walker for support if needed.
- Counting Fun (5 min) — monitor\_and\_enrich**  
Count objects around the house together, such as toys or snacks. Help Ethan count up to 10.
- Jumping Fun (5 min) — needs\_special\_support**  
Create a safe space with a soft surface. Encourage Ethan to jump with both feet, using a small trampoline or jumping in place.

## 5. Summary

This plan prioritizes Movement / Physical, Cognitive / Adaptive for Ethan. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

## 6. Advisor Review

Short feedback: What would you change? | What is missing? | Any concerns?

# C06 — Amina (5 years)

Diagnosis: Global developmental delay

## 1. Child Profile

Name: Amina  
Age: 5 years (60 months)  
Diagnosis: Global developmental delay  
Daily time: 10 min/day

### Key concerns:

- Learning and routines are hard
- Short attention span
- follows only simple directions

## 2. Parent Input (questions + answers)

- [48m] catches a large ball most of the times -> sometimes (ok)
- [48m] holds crayon or pencil between fingers and thumb not fist -> sometimes (ok)
- [48m] serves herself food or pours water with adult supervision -> sometimes (ok)
- [60m] buttons some buttons -> with\_help (ok)
- [60m] hops on one foot -> sometimes (ok)
- [48m] asks to go play with children if none are around like can I play with Alex -> no (ok)
- [48m] avoids danger like not jumping from tall heights at the playground -> no (ok)
- [48m] changes behavior based on where she is like place of worship or library or playground -> with\_help (ok)
- [60m] does simple chores at home like matching socks or cleaning the table after eating -> with\_help (ok)
- [60m] follows rules or takesake turns when playing games with other children -> with\_help (ok)
- [60m] sings dances or acts for you -> sometimes (ok)
- [48m] answers simple questions like what is a coat for or what is crayon for -> no (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 48      | 12  | needs_special_supp |
| Social / Emotional       | 48      | 12  | needs_special_supp |
| Language / Communication | 48      | 12  | needs_special_supp |
| Cognitive / Adaptive     | 30      | 30  | needs_special_supp |

### Focus areas:

- Cognitive / Adaptive
- Movement / Physical
- Social / Emotional

## 4. Daily Activities

- 1. Color Sorting (5 min) — needs\_special\_support  
Gather a few colored items (like blocks or crayons). Ask Amina to sort them into groups by color. You can say, 'Can you put all the red ones here?'
- 2. Playful Pretend (5 min) — needs\_special\_support  
Choose a character together (like a superhero or teacher) and take turns pretending to be that character. Use simple phrases and actions to act out scenarios.
- 3. Two-Step Instructions (5 min) — needs\_special\_support  
Give Amina simple two-step instructions like 'Pick up the toy and put it in the box.' Praise her when she follows the directions.
- 4. Emotion Charades (5 min) — needs\_special\_support  
Take turns making faces to show different emotions (happy, sad, surprised). The other person guesses the emotion and then switches roles.
- 5. Problem-Solving with a Stool (5 min) — needs\_special\_support  
Place a toy on a high shelf and encourage Amina to use a small stool to reach it. Guide her by saying, 'Can you stand on the stool to get the toy?'

## 5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Amina. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

## 6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness  
Short feedback: What would you change? | What is missing? | Any concerns?

# C07 — Lucas (14 months)

Diagnosis: Fragile X syndrome

## 1. Child Profile

Name: Lucas  
Age: 14 months (14 months)  
Diagnosis: Fragile X syndrome  
Daily time: 10 min/day

### Key concerns:

- Not walking
- limited babbling
- Sensory sensitivity
- shy socially

## 2. Parent Input (questions + answers)

- [4m] bring hands to mouth -> yes (ok)
- [4m] holds a toy when you put it in his hand -> yes (ok)
- [4m] holds head steady without support when you are holding him -> yes (ok)
- [6m] leans on hands to support herself when sitting -> yes (ok)
- [6m] pushes up with straight arms when on tummy -> yes (ok)
- [6m] rolls from tummy to back -> yes (ok)
- [9m] gets to sitting position by herself -> yes (ok)
- [9m] moves things from one hand to her other hand -> yes (ok)
- [9m] sits without support -> no (ok)
- [4m] chuckles when you try to make him laugh but not yet a full laugh -> yes (ok)
- [4m] looks at you moves or makes sounds to get or keep you attention -> yes (ok)
- [4m] smiles on his own to get your attention -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 9       | 5   | needs_special_supp |
| Social / Emotional       | 9       | 5   | needs_special_supp |
| Language / Communication | 4       | 10  | needs_special_supp |
| Cognitive / Adaptive     | 6       | 8   | needs_special_supp |

### Focus areas:

- Language / Communication
- Cognitive / Adaptive
- Movement / Physical

## 4. Daily Activities

### 1. Sound Imitation Game (5 min) — needs\_special\_support

Make simple sounds like 'ahh' or 'ooo' and encourage Lucas to imitate you. Use a happy tone and smile to engage him.

### 2. Sitting Up with Support (5 min) — needs\_special\_support

Place Lucas in a sitting position with pillows around him for support. Encourage him to reach for toys placed slightly out of reach to practice balance and sitting without support.

### 3. Sound Exploration with Toys (5 min) — needs\_special\_support

Use toys that make sounds (like rattles or musical toys). Shake or press them to make sounds and encourage Lucas to mimic or respond.

### 4. Hand Transfer Game (5 min) — needs\_special\_support

Give Lucas a small toy in one hand and encourage him to move it to the other hand. You can model this by doing it yourself first.

### 5. Follow the Sound (5 min) — needs\_special\_support

Make a sound (like clapping or a simple word) and encourage Lucas to turn his head towards you. Reward him with smiles when he responds.

## 5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Lucas. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

## 6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness

Short feedback: What would you change? | What is missing? | Any concerns?

# C08 — Emma (2y 8m)

Diagnosis: Suspected childhood apraxia of speech

## 1. Child Profile

Name: Emma  
Age: 2y 8m (32 months)  
Diagnosis: Suspected childhood apraxia of speech  
Daily time: 10 min/day

### Key concerns:

- Very limited speech output
- Uses gestures
- gets frustrated
- inconsistent sounds

## 2. Parent Input (questions + answers)

- [24m] eats with a spoon -> yes (ok)
- [24m] kicks a ball -> yes (ok)
- [24m] runs -> yes (ok)
- [30m] jumps off the ground with both feet -> yes (ok)
- [30m] takes some clothes off by himself like loose pants or an open jacket -> yes (ok)
- [30m] turns book pages one at a time when you read to her -> yes (ok)
- [36m] puts on some clothes by himself like loose pants or a jacket -> yes (ok)
- [36m] strings items together like large beads or macaroni -> yes (ok)
- [36m] uses a fork -> yes (ok)
- [18m] helps you dress him by pushing the arm through the sleeve or lifting up the foot -> yes (ok)
- [18m] looks at a few pages in a book with you -> yes (ok)
- [18m] moves away from you but looks to make sure you are close by -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 36      | 0   | no_special_support |
| Social / Emotional       | 30      | 2   | no_special_support |
| Language / Communication | 24      | 8   | needs_special_supp |
| Cognitive / Adaptive     | 30      | 2   | no_special_support |

### Focus areas:

- Language / Communication

## 4. Daily Activities

- 1. Body Part Pointing (5 min) — needs\_special\_support**  
Ask Emma to point to different body parts on herself and on a doll or stuffed animal. Start with familiar parts like 'nose' and 'eyes'.
- 2. Two-Word Phrases (5 min) — needs\_special\_support**  
Use toys or snacks to encourage Emma to say two-word phrases like 'more juice' or 'big truck'. Model the phrases and wait for her to imitate.
- 3. Gesture Game (5 min) — needs\_special\_support**  
Play a game where you and Emma take turns using gestures to communicate. For example, blowing a kiss or nodding yes. Encourage her to imitate your gestures.
- 4. Book Exploration (7 min) — needs\_special\_support**  
Choose a picture book and ask Emma to point to specific items, like 'Where is the bear?' Encourage her to make sounds or say words related to the pictures.
- 5. Naming Objects in Books (10 min) — needs\_special\_support**  
Look at a book together and point to different objects, asking Emma 'What is this?' Encourage her to name the objects or make sounds related to them.

## 5. Summary

This plan prioritizes Language / Communication for Emma. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

## 6. Advisor Review

# C09 — Zain (4 years)

Diagnosis: Attention and self-regulation concerns (possible ADHD)

## 1. Child Profile

Name: Zain  
Age: 4 years (48 months)  
Diagnosis: Attention and self-regulation concerns (possible ADHD)  
Daily time: 10 min/day

### Key concerns:

- Very active
- impulsive
- Big emotional reactions
- interrupts

## 2. Parent Input (questions + answers)

- [30m] jumps off the ground with both feet -> yes (ok)
- [30m] takes some clothes off by himself like loose pants or an open jacket -> yes (ok)
- [30m] turns book pages one at a time when you read to her -> sometimes (ok)
- [36m] puts on some clothes by himself like loose pants or a jacket -> yes (ok)
- [36m] strings items together like large beads or macaroni -> sometimes (ok)
- [36m] uses a fork -> sometimes (ok)
- [48m] catches a large ball most of the times -> sometimes (ok)
- [48m] holds crayon or pencil between fingers and thumb not fist -> sometimes (ok)
- [48m] serves herself food or pours water with adult supervision -> sometimes (ok)
- [30m] follos simple routines when told like helping to pick up toys when you say it is clean up
- [30m] plays next to other children and sometimes plays with them -> yes (ok)
- [30m] shows you what she can do by saying look at me -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 30      | 18  | needs_special_supp |
| Social / Emotional       | 30      | 18  | needs_special_supp |
| Language / Communication | 48      | 0   | no_special_support |
| Cognitive / Adaptive     | 30      | 18  | needs_special_supp |

### Focus areas:

- Movement / Physical
- Social / Emotional
- Cognitive / Adaptive

## 4. Daily Activities

### 1. Clean-Up Time Together (5 min) — needs\_special\_support

At a designated clean-up time, encourage Zain to help pick up toys. Use a timer for 5 minutes and make it a fun challenge to see how many toys can be picked up together.

### 2. Jumping Fun (5 min) — needs\_special\_support

Create a safe space and encourage Zain to jump off a low surface (like a step or a cushion) using both feet. Start with a small height and gradually increase as he gains confidence.

### 3. Look at Me Game (5 min) — needs\_special\_support

Take turns with Zain to show fun actions or silly faces. Encourage him to say 'look at me' when he does something fun. This promotes shared attention and social engagement.

### 4. Page Turner (5 min) — needs\_special\_support

Read a picture book together and encourage Zain to turn the pages one at a time. Use a book with thicker pages for easier handling.

### 5. Emotion Charades (5 min) — needs\_special\_support

Take turns acting out different emotions (happy, sad, surprised) and have Zain guess which emotion it is. This encourages emotional recognition and expression.

## 5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Cognitive / Adaptive for Zain. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

## 6. Advisor Review

Rate 1–5: Clinical appropriateness | Safety | Practicality for parents | Clarity | Overall usefulness

Short feedback: What would you change? | What is missing? | Any concerns?

# C10 — Isla (3y 8m)

Diagnosis: SYNGAP1-related disorder

## 1. Child Profile

Name: Isla  
Age: 3y 8m (44 months)  
Diagnosis: SYNGAP1-related disorder  
Daily time: 10 min/day

### Key concerns:

- Delayed speech and balance
- Attention issues
- clumsy gait
- limited pretend play

## 2. Parent Input (questions + answers)

- [24m] eats with a spoon -> sometimes (ok)
- [24m] kicks a ball -> sometimes (ok)
- [24m] runs -> sometimes (ok)
- [30m] jumps off the ground with both feet -> sometimes (ok)
- [30m] takes some clothes off by himself like loose pants or an open jacket -> sometimes (ok)
- [30m] turns book pages one at a time when you read to her -> sometimes (ok)
- [36m] puts on some clothes by himself like loose pants or a jacket -> sometimes (ok)
- [36m] strings items together like large beads or macaroni -> sometimes (ok)
- [36m] uses a fork -> sometimes (ok)
- [24m] looks at your face to see how to react in a new situation -> sometimes (ok)
- [24m] notices when others are hurt or upset like pausing or looking sad when someone is crying -> sometimes (ok)
- [30m] follos simple routines when told like helping to pick up toys when you say it is clean up time -> with\_help (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 24      | 20  | needs_special_supp |
| Social / Emotional       | 24      | 20  | needs_special_supp |
| Language / Communication | 24      | 20  | needs_special_supp |
| Cognitive / Adaptive     | 24      | 20  | needs_special_supp |

### Focus areas:

- Movement / Physical
- Social / Emotional
- Language / Communication

## 4. Daily Activities

- 1. Body Part Pointing (5 min) — needs\_special\_support**  
Ask Isla to point to specific body parts on herself or on a doll, like 'Where's your nose?' or 'Show me the doll's eyes.'
- 2. Spoon Practice (5 min) — needs\_special\_support**  
Provide Isla with a bowl of soft food and a spoon. Encourage her to scoop and eat the food using the spoon. Offer assistance as needed to help her practice holding the spoon correctly.
- 3. Two-Word Phrases (5 min) — needs\_special\_support**  
Encourage Isla to use two-word phrases by modeling them. For example, say 'More juice' or 'Big truck' and encourage her to repeat after you.
- 4. Ball Kicking (5 min) — needs\_special\_support**  
Set up a soft ball in an open space. Encourage Isla to kick the ball with her foot. You can demonstrate and then take turns kicking the ball back and forth.
- 5. Gesture Game (5 min) — needs\_special\_support**  
Play a game where you model different gestures like blowing a kiss, nodding, or waving. Encourage Isla to imitate these gestures.

## 5. Summary

This plan prioritizes Movement / Physical, Social / Emotional, Language / Communication for Isla. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

# C11 — Aria (20 months)

Diagnosis: No diagnosis

## 1. Child Profile

Name: Aria  
Age: 20 months (20 months)  
Diagnosis: No diagnosis  
Daily time: 10 min/day

### Key concerns:

- Only ~10 words
- very active
- good eye contact
- understands well

## 2. Parent Input (questions + answers)

- [12m] drinks from a cup without a lid as you hold it -> yes (ok)
- [12m] picks things up between thumb and pointer finger like small bits of food -> yes (ok)
- [12m] pulls up to stand -> yes (ok)
- [15m] takes a few steps on her own -> yes (ok)
- [15m] uses fingers to feed herself some food -> yes (ok)
- [18m] climbs on and off a couch or chair without help -> yes (ok)
- [18m] drinks from a cup without a lid and may spill sometimes -> yes (ok)
- [18m] feeds himself with his fingers -> yes (ok)
- [15m] claps when excited -> yes (ok)
- [15m] copies other children while playing like taking toys out of a container when another child does -> yes (ok)
- [15m] hugs stuffed doll or other toy -> yes (ok)
- [18m] helps you dress him by pushing the arm through the sleeve or lifting up the foot -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 18      | 2   | no_special_support |
| Social / Emotional       | 24      | 0   | no_special_support |
| Language / Communication | 18      | 2   | no_special_support |
| Cognitive / Adaptive     | 24      | 0   | no_special_support |

### Focus areas:

## 4. Daily Activities

## 5. Summary

This output did not identify a strong need for special support across the reviewed categories, but the family can continue monitoring development and bring remaining questions to the clinician.

## 6. Advisor Review

# C12 — Mateo (2y 6m)

Diagnosis: No formal diagnosis

## 1. Child Profile

Name: Mateo  
Age: 2y 6m (30 months)  
Diagnosis: No formal diagnosis  
Daily time: 10 min/day

### Key concerns:

- Good eye contact but no words
- lines up toys
- responds to name inconsistently

## 2. Parent Input (questions + answers)

- [18m] climbs on and off a couch or chair without help -> yes (ok)
- [18m] drinks from a cup without a lid and may spill sometimes -> yes (ok)
- [18m] feeds himself with his fingers -> yes (ok)
- [24m] eats with a spoon -> yes (ok)
- [24m] kicks a ball -> yes (ok)

- [30m] takes some clothes off by himself like loose pants or an open jacket -> yes (ok)
- [30m] turns book pages one at a time when you read to her -> yes (ok)
- [18m] helps you dress him by pushing the arm through the sleeve or lifting up the foot sometimes (ok)
- [18m] looks at a few pages in a book with you -> yes (ok)
- [18m] moves away from you but looks to make sure you are close by -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 30      | 0   | no_special_support |
| Social / Emotional       | 18      | 12  | needs_special_supp |
| Language / Communication | 12      | 18  | needs_special_supp |
| Cognitive / Adaptive     | 18      | 12  | needs_special_supp |

### Focus areas:

- Language / Communication
- Social / Emotional
- Cognitive / Adaptive

## 4. Daily Activities

- 1. Sound Imitation Game (5 min) — needs\_special\_support**  
Make different animal sounds and encourage Mateo to imitate them. Start with simple sounds like 'moo' for a cow or 'meow' for a cat. Use gestures to encourage him to join in.
- 2. Chore Imitation (5 min) — needs\_special\_support**  
Show Mateo how to sweep the floor with a broom. Encourage him to copy you while you sweep together.
- 3. Follow the Gesture (5 min) — needs\_special\_support**  
Show Mateo a simple gesture like waving or pointing. Encourage him to copy you. Then, ask him to do the gesture when you say a word related to it, like 'bye-bye' for waving.
- 4. Toy Car Push (5 min) — needs\_special\_support**  
Sit on the floor with Mateo and take turns pushing a toy car back and forth. Encourage him to push the car towards you.
- 5. Simple Direction Following (5 min) — needs\_special\_support**  
Give Mateo simple directions using both words and gestures, like 'come here' or 'give me the ball'. Celebrate when he follows your direction.

## 5. Summary

This plan prioritizes Social / Emotional, Language / Communication, Cognitive / Adaptive for Mateo. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

# C13 — Luna (3y 6m)

Diagnosis: Speech delay

## 1. Child Profile

Name: Luna

Age: 3y 6m (42 months)

Diagnosis: Speech delay

Daily time: 10 min/day

### Key concerns:

- Limited speech
- understands well
- parents have very limited time for activities

## 2. Parent Input (questions + answers)

- [30m] jumps off the ground with both feet -> yes (ok)
- [30m] takes some clothes off by himself like loose pants or an open jacket -> yes (ok)
- [30m] turns book pages one at a time when you read to her -> yes (ok)
- [36m] puts on some clothes by himself like loose pants or a jacket -> yes (ok)
- [36m] strings items together like large beads or macaroni -> yes (ok)
- [36m] uses a fork -> yes (ok)
- [48m] catches a large ball most of the times -> yes (ok)
- [48m] holds crayon or pencil between fingers and thumb not fist -> yes (ok)
- [48m] serves herself food or pours water with adult supervision -> yes (ok)
- [24m] looks at your face to see how to react in a new situation -> yes (ok)
- [24m] notices when others are hurt or upset like pausing or looking sad when someone is crying -> yes (ok)
- [30m] follos simple routines when told like helping to pick up toys when you say it is clean up time -> yes (ok)

|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 48      | 0   | no_special_support |
| Social / Emotional       | 30      | 12  | needs_special_supp |
| Language / Communication | 24      | 18  | needs_special_supp |
| Cognitive / Adaptive     | 36      | 6   | monitor_and_enrich |

### Focus areas:

- Language / Communication
- Social / Emotional
- Cognitive / Adaptive

## 4. Daily Activities

### 1. Body Part Pointing (5 min) — needs\_special\_support

Ask Luna to point to different body parts on herself or on a doll. Start with common ones like 'nose' and 'eyes'.

### 2. Clean Up Time (5 min) — needs\_special\_support

At a designated time, say 'It's clean up time!' and encourage Luna to help pick up her toys. Use eye contact and praise her efforts.

### 3. Two-Word Phrases (5 min) — needs\_special\_support

Encourage Luna to use two-word phrases by modeling them. For example, say 'more juice' and prompt her to repeat it.

### 4. Look at Me Game (5 min) — needs\_special\_support

Take turns with Luna to show each other something fun you can do. Encourage her to say 'Look at me!' when it's her turn.

### 5. Gesture Game (5 min) — needs\_special\_support

Play a game where you model different gestures (like blowing a kiss or nodding) and encourage Luna to imitate you.

## 5. Summary

This plan prioritizes Social / Emotional, Language / Communication, Cognitive / Adaptive for Luna. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.

# C14 — Ryan (4y 2m)

Diagnosis: No diagnosis

## 1. Child Profile

Name: Ryan  
Age: 4y 2m (50 months)  
Diagnosis: No diagnosis  
Daily time: 10 min/day

### Key concerns:

- Tantrums
- difficulty with transitions
- strong language skills
- social but rigid

## 2. Parent Input (questions + answers)

- [36m] puts on some clothes by himself like loose pants or a jacket -> sometimes (ok)
- [36m] strings items together like large beads or macaroni -> sometimes (ok)
- [36m] uses a fork -> sometimes (ok)
- [48m] catches a large ball most of the times -> sometimes (ok)
- [48m] holds crayon or pencil between fingers and thumb not fist -> sometimes (ok)
- [48m] serves herself food or pours water with adult supervision -> sometimes (ok)
- [36m] calms down within 10 minutes after you leave her like at childcare drop off -> no (ok)
- [36m] notices other children and joins them to play -> yes (ok)
- [48m] asks to go play with children if none are around like can I play with Alex -> yes (ok)
- [48m] avoids danger like not jumping from tall heights at the playground -> yes (ok)
- [48m] changes behavior based on where she is like place of worship or library or playground -> with help (ok)
- [36m] ask who or what or where or why questions like where is mommy or where is daddy -> yes (ok)

Full transcript is preserved in JSON output.

## 3. Genex Output

| Domain                   | Dev age | Gap | Tier               |
|--------------------------|---------|-----|--------------------|
| Movement / Physical      | 36      | 14  | needs_special_supp |
| Social / Emotional       | 48      | 2   | no_special_support |
| Language / Communication | 48      | 2   | no_special_support |
| Cognitive / Adaptive     | 48      | 2   | no_special_support |

### Focus areas:

- Movement / Physical

## 4. Daily Activities

### 1. Dress-Up Challenge (5 min) — needs\_special\_support

Provide Ryan with loose clothing items like a jacket or pants. Encourage him to put them on by himself. Offer assistance as needed, but let him try independently first.

### 2. Ball Toss (5 min) — needs\_special\_support

Stand a few feet away from Ryan and toss a large ball to him. Encourage him to catch it. If he struggles, encourage him to try again. This helps with hand-eye coordination.

### 3. Bead Stringing (7 min) — needs\_special\_support

Give Ryan large beads or macaroni and a string. Encourage him to string them together, helping him if he struggles. Focus on his grip and coordination.

### 4. Crayon Drawing (10 min) — needs\_special\_support

Provide Ryan with crayons and paper. Encourage him to hold the crayon between his fingers and thumb, not in a fist, while drawing. Offer prompts for different shapes or lines.

### 5. Pouring Practice (10 min) — needs\_special\_support

With adult supervision, provide Ryan with a small pitcher of water and a cup. Encourage him to pour the water into the cup, focusing on control and balance.

## 5. Summary

This plan prioritizes Movement / Physical for Ryan. The activities are intended to be short, parent-friendly, and aligned with the developmental areas that appeared most delayed or most worth enriching in the interview.
